

MedRecord App Store Launch Document Register

Required documents, owners, and completion order

MedRecord 1.2.1 build 2

Bundle ID askmaggi.com.MedRecord

Prepared October 2, 2026

Prepared for owner approval

Confirm the legal operator, public URLs, distribution regions, and final App Store Connect answers before publication or submission.

Purpose

This register identifies the document set prepared for the MedRecord App Store launch and separates materials submitted to Apple from public policies and internal compliance records. The set reflects the inspected MedRecord 1.2.1 build 2, which stores encrypted records locally, does not use HealthKit, and offers an optional openFDA medication-name lookup.

Document set

No	Document	Purpose	Required action
01	Privacy Policy	Public policy linked in App Store Connect and inside the app	Publish at stable HTTPS URL
02	Terms of Use	Public terms and medical-use limitations	Owner and legal approval
03	Support and Account Deletion Guide	Public support page content and deletion instructions	Publish at stable HTTPS URL
04	App Store Submission Workbook	Copy-ready metadata, review notes, and portal answers	Complete owner fields and paste into App Store Connect
05	Compliance and Release File	Internal privacy, medical, security, testing, and approval record	Complete and retain with release evidence

Owner information to complete

Field	Current working value	Required decision
Legal operator	Maggi Honda	Confirm this matches the Apple Developer legal entity
Enrollment type	Individual	Individual or organization
Review phone	+1 813 767-2488	Add monitored number in international format
Price	\$4.99	Free or selected price tier
Regions	US, Florida	Select launch countries and regions
EU DSA status	Non-Trader	Trader or non-trader; supply proof if required
Copyright holder	Pending Copyright	Enter exact rights holder
Privacy URL	https://askmaggi.com/MedRecord/privacy.html	Publish and verify unauthenticated HTTPS access
Support URL	https://askmaggi.com/MedRecord/support.html	Publish and verify unauthenticated HTTPS access

Completion order

1. Confirm the legal operator, Apple Developer enrollment type, contact details, pricing, distribution regions, and copyright holder.
2. Have the Privacy Policy and Terms of Use reviewed for the intended regions, then publish the Privacy Policy and Support Guide at their stable HTTPS URLs.
3. Complete the App Privacy, age-rating, regulated-medical-device, export-compliance, content-rights, and DSA declarations in the submission workbook.
4. Capture App Store screenshots with fictional data and complete the physical iPhone and iPad test matrix.
5. Upload a unique signed build, resolve App Store Connect warnings, attach the final build, and enter the approved review notes.
6. Retain screenshots of final portal answers, test evidence, source commit, archive identity, and approval signatures in the compliance file.

Launch gate

- ☐ Legal entity and owner contact fields confirmed
- ☐ Public privacy and support URLs working over HTTPS
- ☐ App Privacy answer reconciled with openFDA behavior
- ☐ Medical-device and DSA declarations completed
- ☐ Screenshots contain fictional data and match the submitted build
- ☐ Physical iPhone and iPad tests passed
- ☐ Unique build processed successfully in App Store Connect
- ☐ Final release approval signed

This document set supports the launch process but does not replace advice from qualified legal, privacy, tax, medical-device, or export-control professionals.
