Who we are

Engineering solutions built around your needs.

Enginovva Solutions is a versatile engineering and industrial solutions partner. We help businesses move from technical challenges to workable designs, manufactured parts and reliable sourcing.

Our approach combines engineering insight, collaboration and a focus on quality, practicality and cost effectiveness.

- Engineering-led problem solving
- Flexible support from concept to production
- Supplier and manufacturing coordination

Our mission

Make engineering ideas achievable.

Bridge innovation and industry through thoughtful design, dependable manufacturing pathways and responsive technical support.

What we do

End-to-end engineering and industrial services, from development to production and procurement.

Mechanical design and R&D

3D CAD design, product development, design reviews, prototyping and engineering documentation.

Precision manufacturing

CNC machining, sheet metal, stamping, molding and production coordination.

Fabrication and assembly

Custom brackets, enclosures, structures, jigs, fixtures and mechanical assemblies.

Industrial equipment supply

Industrial components, equipment sourcing and fit-for-purpose technical products, including engineering lab equipment.

Testing and validation

Fit checks, prototype evaluation, engineering verification and supplier quality coordination.

Procurement and sourcing

Supplier identification, quotations, part sourcing and manufacturing partner engagement.

We also offer 3D printing, modifications to existing equipment, and consultancy for improvement projects. See our Services Offered brochure for details.

From first sketch to finished solution

Our capabilities across development, production and supply.

Product engineering

Mechanical assemblies, enclosure design, design for manufacture (DFM) and prototype iterations.

Custom manufacturing

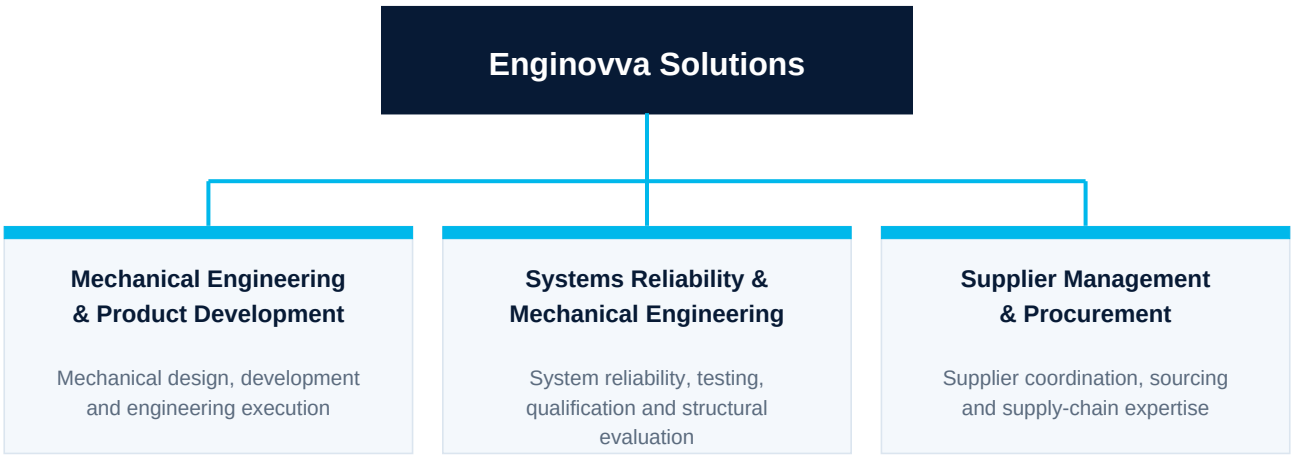

Precision parts, sheet metal, fabrication and tooling support.

Industrial solutions

Components, equipment and supplier integration for industrial needs.

Our team

The engineering functions behind Enginovva.
