

Medication + Symptom Observation Log

Track as prescribed. This page is not a tool for changing medication on your own.

Date / time	Medication as taken	Meal timing	Symptoms before	Symptoms after	Question

BRING CONTEXT

Include sleep, meals, activity, stress, bowel changes, and other timing information when relevant. A pattern can help the prescriber decide what needs evaluation; it does not prove the cause.

Welcome

A conversation tool for people living with Parkinson's and their care partners.

WORKBOOK PROMISE

Good observations are more useful than perfect memory. Track what happens, notice timing, and bring the pattern to your care team.

How to use it

- 1 Choose one episode or concern at a time.
- 2 Use the matching worksheet or log for one to two weeks.
- 3 Record timing, symptoms, function, safety concerns, and barriers without judging yourself.
- 4 Bring one clear pattern and one clear question to the appropriate clinician.
- 5 Reassess after a clinician-guided change and record what happened.

SAFETY FIRST

This workbook is educational and does not replace medical care. Do not start, stop, or change medication timing, exercise intensity, diet, fluids, supplements, sleep treatments, speech practice, food textures, or swallowing exercises without guidance from a qualified clinician. Seek urgent help for sudden new neurologic symptoms, chest pain, severe shortness of breath, a serious fall or injury, inability to breathe or speak because of choking, or urgent risk of self-harm.
