ABOUT US

CONTINENTAL ACES SDN BHD, formerly known as ACES LOC MARKETING (2009), established since 2012.

With an industry standing of more than 10 years, we currently serve a wide range of clients from developers, main contractors to interior designers.

Inspired by Malaysia's tropical rainforest resources, Continental Aces focuses on supplying branded wood designed flooring and superb quality artificial turf.

The headquarters based at Alam Perdana Industrial Park, Puchong showcases a variety of complete wood flooring and artificial turf.

Innovation Beneath Your Feet

ABOUT US

Waze: Continental Aces
Sdn. Bhd.

VISION

To be the leading provider of innovative and sustainable composite flooring and premium artificial turf solution, enhancing the quality and easthetics of spaces worldwide.

MISSION

At Continental Aces Sdn Bhd, we are dedicated to delivering high quality, durable and eco-friendly composite flooring and artificial turf solutions that exceed customer expectations. We strive to enhance both indoor and outdoor environments through innovation, exceptional service and a commitment to sustainability.

GOALS

Innovation Beneath Your Feet

01

Achieve a customer satisfaction rating of 90% or higher by the end of the next fiscal year.

02

Expand our market presence by entering three new international markets within the next three years.

03

Reduce the environmental impact of our production processes by 25% over the next five years.

04

Launch at least two new product lines annually that incorporate the latest advancements.

05

Provide at least 20 hours of training per employee annually. Contribute at least 1,000 volunteer hours annually to community projects promoting sustainability and sports.

WOODEN LAMINATE COLLECTION

Not only is the composite timber material of laminate flooring hard-wearing, but the uppermost layer of laminate also offers fantastic scratch resistance. Wooden laminate has its own aesthetic beauty where many laminate floorboards feature unique embossing to mimic the appearance and texture of natural wood.

A new plastic composite products with advanced premium shield.

ULTRA SHIELD DECK

Ultra Shield Deck or also called as co-extruded decking is the new technology of new wood plastic composite products that boasts even higher performance than normal composite decking, which has an advanced premium shield encasing all four sides around its inner core.

The shield and core are extruded together under a very high temperature mold simultaneously. It gives both great-looking end result and top-end performance.

The outer layer is effective against the penetration of colored liquids and oil-containing liquids, making the surface of the board very easy to clean.

It has significantly better scratch resistance ensuring durability and longevity.

Additionally, it has a lower expansion rate compared to normal composite decking.

- Scratch resistant
- Waterproof
- Weather resistant
- Termite proof

5
YEARS
WARRANTY

This Ultra Shield Deck will not splinter or crack, due to its protective shield, making your home safer for bare feet, small children and pets while also protecting against rot, cracking or insect damage.

MACTEX™ MXC 20

A nonwoven polypropylene geotextile. Range between 125gsm – 700gsm

Soil Construction

Mactex™ nonwoven range of geotextiles improve the subgrade on existing solid ground. Where roads are constructed over in situ soils of low bearing capacity, Mactex™ provides separation to prevent the intermixing of natural soil with the aggregates. It also acts as a filter, assisting dissipation of pore water pressure and enhancing drainage beneath the road formation.

Mactex™ is used as a separator to prevent contamination of soil base resulting in longer pavement life.

Separation, Filtration, Hydraulics & Reinforcement Solutions
