Brief Introduction of the Company :

UNITRADE VENTURES PRIVATE LIMITED is a dynamic food-sector startup incorporated in **August 2025** with a clear vision to build a modern, reliable and scalable food supply platform catering to both the **Indian and international markets**.

The Company has been established with the objective of offering a diversified range of food products, extending from **traditional food grains and essential food commodities to innovative Ready-to-Eat and instant meal solutions** designed for the fast-changing needs of modern consumers. Its Ready-to-Eat products are developed with a strong focus on convenience, nutrition, quality and accessibility, enabling consumers to simply open the pack, add hot water and enjoy a wholesome meal within approximately **three minutes**.

The Company has received **STARTUP RECOGNITION from the Department for Promotion of Industry and Internal Trade (DPIIT), Ministry of Commerce & Industry, Government of India**, further reinforcing its identity as an innovation-driven and growth-oriented enterprise. Together, these licences, certifications and recognitions strengthen Unitrade's credibility and support its objective of building a professionally managed, quality-focused and scalable food business for both domestic and international markets and is also **Registered as a Micro, Small & Medium Enterprise (MSME) under the Udyam Registration framework of the Government of India, reflecting the Company's formal recognition as a growing enterprise contributing to entrepreneurship, employment and economic development.**

The Company operates with a strong commitment to **Food Safety, Quality Assurance, Regulatory Compliance and Innovation**. The Company holds a valid **FSSAI Licence**, reflecting its adherence to the prescribed food-safety and hygiene requirements applicable to the food business in India, and is also certified under **ISO 9001:2015**, demonstrating the adoption of a structured Quality Management System focused on consistency, process control, customer satisfaction and continuous improvement.

Since its inception, the Company has demonstrated encouraging market acceptance and commercial potential, achieving a **monthly turnover of approximately ₹1 crore**. This early performance reflects the growing demand for convenient, hygienically prepared and easily accessible food products across multiple consumer segments.

The startup has been conceived by its director with a broader vision aligned with the spirit of **"Viksit Bharat"** where innovation, entrepreneurship and food accessibility contribute to inclusive economic and social progress. The philosophy **behind Unitrade Ventures Private** Limited goes beyond commercial growth; it is driven by the aspiration that **no individual should remain hungry merely because of location, time constraints, occupation or circumstances**.

Director Profile

Prof. (Dr.) Ramendra Pati Pandey is a distinguished scientist, academic leader and researcher with extensive experience in **biosciences, microbiology, immunology, infectious diseases, translational research and biotechnology**. He presently serves as **Dean (Research & Development) and Director, School of Biosciences and Bioengineering, D.Y. Patil International University, Pune**. His academic and research career spans India as well as leading international institutions in Taiwan and Brazil, giving him a strong global scientific perspective.

Dr. Pandey has authored **more than 100 peer-reviewed scientific publications** and has received approximately **8,500 Google Scholar citations**, reflecting the depth and recognition of his research contributions. He has also received numerous national and international awards, fellowships and professional distinctions, and has been recognised among the **world's top 5% scientists by the Global Scientific Index & Researcher Ranking 2026**.

His international research experience includes a prestigious **FAPESP Post-Doctoral Fellowship at the University of São Paulo, Brazil**, research experience at the **Translational Health Science and Technology Institute (THSTI), India**, and research at **Chang Gung University, Taiwan** under a National Science Council fellowship. These assignments have helped him develop a strong understanding of collaborative research, scientific innovation, international standards and translational applications of biotechnology.

Dr. Pandey holds a **Ph.D. from the University of Delhi**, with research carried out at the Tuberculosis Aerosol Challenge Facility of ICGEB, New Delhi, and an **M.Sc. in Biotechnology from Jawaharlal Nehru University (JNU)**. His scientific work has focused extensively on immune responses, host–pathogen interactions, molecular and cellular biology, infectious diseases and advanced biomedical research.

His work has been recognised through several prestigious honours, including the **DST Young Scientist Award, Indian Immunology Society Young Scientist Award, EFIS and British Society of Immunology Travel Awards, International Union of Immunological Societies Travel Award, International Scientist Award, NESA Scientist of the Year Award, Shri Om Prakash Sharma Award**, and other distinguished scientific recognitions.

He is also associated with several leading scientific and professional bodies, including the **National Academy of Sciences, India; National Academy of Medical Sciences; National Academy of Biological Sciences; National Environmental Science Academy; Sigma Xi; Royal Society of Chemistry, UK; and Royal Society of Tropical Medicine and Hygiene, UK**.

His association with - Unitrade Ventures Private Limited provides the Company with a strong scientific and research-driven foundation for developing safe, hygienic and innovative food products. His expertise can be effectively leveraged in the areas of **Food Safety, Microbiological Quality, Shelf-Life Validation, Preservative-Free Product Development, Nutritional Innovation and Advancement** of Ready-to-Eat food

solutions for domestic and international markets. Through science-led product development, quality enhancement and innovation, his contribution supports Unitrade's objective of building a modern and globally competitive food enterprise aligned with the vision of **"Viksit Bharat"**, while promoting food accessibility, value addition, employment generation and growth of India's food-processing sector.

Dr. Pandey's strong research background can help Unitrade establish an effective **Research & Development framework** for improving existing products and developing new ones.

The Company can progressively work towards developing:

- improved Ready-to-Eat formulations;
- nutritionally balanced meal options;
- high-protein products;
- foods designed for students and working professionals;
- travel-friendly meals;
- specialised food solutions for sportspersons;
- products suitable for defence and remote-area deployment;
- emergency and disaster-relief food solutions; and
- products designed for international markets.

His research experience can also help in establishing scientific protocols for evaluating product quality, shelf life and nutritional characteristics before large-scale commercialisation.

Objectives of the Products

Unitrade Ventures Private Limited aims to serve the everyday food requirements of a wide spectrum of consumers, including **working professionals living away from their families, students residing in hostels, travellers undertaking journeys by Road, Rail or Air, defence personnel serving in difficult and remote conditions, Sportspersons, Emergency-duty personnel, Institutions and other individuals requiring quick and convenient meal solutions**.

Through quality sourcing, efficient supply-chain management, modern food-processing concepts and consumer-friendly packaging, Unitrade Ventures Private Limited seeks to create a strong bridge between **traditional Indian food values and contemporary convenience**.

The Company's mission is to develop and deliver **safe, hygienic, affordable, nutritious and easily accessible food products** while progressively expanding its presence in domestic as well as international markets. With innovation, quality and social responsibility at its core, Unitrade Ventures Private Limited aspires to emerge as a trusted food brand contributing meaningfully to India's food-processing ecosystem, employment generation, value addition and the larger vision of a self-reliant and developed nation.

Product Profile / Proposed Product Range

Unitrade Ventures Private Limited offers a thoughtfully developed range of **Ready-to-Eat Indian meals** created for consumers who seek authentic taste, convenience and reliability without compromising on quality.

Our product range presently includes **Poha, Upma, Dal-Chawal, Rajma-Jeera Rice, Chole Chawal and Veg Biryani**. Each product is designed to provide the comfort and familiarity of traditional Indian food in a convenient modern format. The meals are simple to prepare—**just open the pack, add hot water and enjoy a satisfying meal within approximately three minutes**.

A key feature of our Ready-to-Eat range is our commitment to **clean and responsible food preparation**. The products are made **without added preservatives** and are manufactured under **high standards of hygiene, cleanliness and quality control**. Particular attention is given to the selection of ingredients, preparation methods, packaging and handling so that the products remain safe, convenient and dependable for consumers.

The range has been developed keeping in mind the needs of today's fast-moving lifestyle—whether for **working professionals, students, travellers, defence personnel, sportspersons or anyone looking for a quick and wholesome meal while away from home**. By combining **traditional Indian recipes with modern food-processing and packaging solutions**, Unitrade Ventures Private Limited aims to make familiar Indian meals available in a form that is **easy to carry, quick to prepare and suitable for consumption anytime and anywhere**.

Market Potential and Demand

The market potential for **Ready-to-Eat and instant meal products in India is substantial and expanding rapidly**, driven by changing lifestyles, increasing mobility, urbanisation, rising workforce participation, growth in student migration, frequent travel, expanding institutional demand and the need for safe and convenient food solutions.

Unitrade Ventures Private Limited intends to address this opportunity by offering **hygienically prepared, preservative-free Ready-to-Eat Indian meals** that can be conveniently prepared by simply adding hot water and are ready for consumption within approximately three minutes. The Company's product range is therefore positioned not merely as packaged food, but as a practical meal solution for consumers who may not have access to a kitchen, sufficient cooking time or freshly prepared food.

Large and Diverse Consumer Base

The potential consumer base extends across several significant segments of Indian society, including working professionals staying away from their families, students living in hostels and rented accommodation, domestic and international travellers, defence personnel, sportspersons, emergency-service personnel, industrial workers, institutions, hospitals, corporate establishments and individuals requiring an economical and convenient meal while away from home.

Working Professionals and Migrant Workforce

Employment-related migration represents one of the most important potential markets for convenient food products. Millions of Indians move away from their hometowns for employment and frequently live in rented accommodation, hostels, shared housing or temporary work locations where regular cooking facilities may be limited.

According to information presented by the Government of India based on Census 2011 data, approximately **4.14 crore persons had migrated across States for work and**

employment. The Government has also noted that migration remains a continuous and dynamic phenomenon.

This represents a large consumer segment for products that are portable, easy to store, require minimal preparation and can provide a familiar Indian meal without dependence on restaurant food or cooking arrangements.

For a working professional returning late from office, a person posted temporarily at a project site or an employee living alone in another city, a three-minute meal can provide a practical alternative to skipping meals or depending continuously on outside food.

Students and Young Consumers

Students constitute another major potential market. India's higher-education system itself has an enrolment of approximately **4.46 crore students**, according to the Ministry of Education's latest completed AISHE survey for 2022-23.

A considerable section of this population studies away from its permanent home in universities, professional colleges, coaching centres, hostels, paying-guest accommodation and rented premises. While there is no reliable current all-India official figure specifically identifying how many of these students reside in hostels, the overall scale of higher-education enrolment demonstrates the size of the addressable student population.

The opportunity extends beyond India as well. The Ministry of External Affairs estimates that **nearly 12.5 lakh Indian students were pursuing higher education abroad as of January 2025**.

For students living abroad, compact Indian Ready-to-Eat products also have the advantage of providing familiar flavours and meal options in locations where Indian food may be comparatively expensive or less accessible.

Railway Travellers – A Major Daily Consumption Opportunity

Rail travel represents one of the largest potential channels for convenient Ready-to-Eat food in India.

Indian Railways carried approximately **741 crore passenger journeys during FY 2025-26**, compared with 716 crores in FY 2024-25. Government data states that Indian Railways carries **more than two crore passengers every day**.

This provides a particularly significant market opportunity. Train journeys often extend for several hours or overnight, and passengers increasingly seek hygienic, affordable and easy-to-carry food choices.

Products such as **Poha, Upma, Dal-Chawal, Rajma-Jeera Rice, Chole Chawal and Veg Biryani** can therefore be relevant for railway stations, trains, travel retail outlets and individual passengers carrying food for their journey.

Even penetration into a very small proportion of India's daily railway passenger traffic can represent a meaningful recurring market.

Air Travellers

Air travel is another steadily expanding consumer segment. Government data for FY 2023-24 reported approximately **30.6 crore domestic passenger movements through Indian airports**, while international passenger traffic was around **7 crores**.

The Ministry of Civil Aviation also reported that domestic scheduled airlines carried **146.4 million passengers during January-November 2024**, and domestic daily passenger traffic crossed **five lakh passengers in a single day** for the first time on 17 November 2024.

This creates opportunities not only for direct passenger consumption, but potentially for airport retail, airline supply, travel packs, lounges, institutional catering and other travel-related channels.

Road Travellers and Tourism

Road transport, interstate buses, private vehicles, pilgrimage travel, tourism and long-distance highway journeys together constitute another broad consumption market.

Ready-to-Eat products have a natural advantage in this environment because they are **lightweight, portable, easy to store and require minimal preparation infrastructure**.

They can be particularly suitable for tour groups, pilgrims, drivers, road travellers and people visiting locations where dependable food availability may be uncertain.

Defence and Personnel Serving in Remote Locations

Defence personnel constitute an important institutional and strategic consumer segment because personnel are frequently stationed in **remote, mountainous, border, desert and difficult operational environments**.

Recent Parliamentary data indicates that the borne strength of Junior Commissioned Officers/Other Ranks, airmen and sailors alone across the Army, Air Force and Navy was approximately **13.48 lakh personnel**, excluding officer strength and certain medical branches.

The nature of defence deployment makes compact, hygienic, easy-to-prepare food particularly relevant in situations where full kitchen infrastructure may not always be readily available.

The Company's Ready-to-Eat concept can therefore have potential relevance, subject to required specifications and procurement standards, for defence establishments, field activities, training camps, disaster-relief operations and similar institutional requirements.

Emergency Services and Disaster-Relief Applications

Ready-to-Eat food also has significant utility beyond normal retail consumption.

Natural disasters, floods, cyclones, earthquakes, rescue operations and emergency situations often create immediate demand for food that can be **transported rapidly, stored conveniently and prepared with minimum resources**.

Government information shows the scale at which emergency operations can take place. For instance, during humanitarian and disaster-relief operations in 2025, the Indian Army deployed **141 columns across more than 80 locations in ten States** and rescued more than 28,000 civilians.

Ready-to-Eat meal packets can therefore potentially serve relief agencies, NGOs, government disaster-management authorities, emergency teams and affected communities, subject to applicable procurement and nutritional requirements.

Sports and Fitness Sector

Athletes and individuals participating in sports frequently travel for competitions, coaching camps and training programmes. The Government's **Khelo India** programme itself covers school, university, rural, indigenous, disability and women's sports and supports sports academies and talent-development programmes across the country.

This segment provides an additional opportunity for specifically designed convenient meals, particularly where portability, portion control, cleanliness and consistent preparation are important.

With appropriate nutritional formulation in future, the Company may also develop products targeted specifically at sportspersons, training camps and fitness-oriented consumers.

Institutional Market

Apart from individual retail customers, Ready-to-Eat food has considerable potential in the **B2B and institutional market**.

Potential institutional customers may include:

- Government departments and public-sector institutions;
- Defence and paramilitary establishments;
- Hospitals and healthcare institutions;
- Universities, colleges and hostels;
- Factories and industrial establishments;
- Corporate offices and cafeterias;
- Airlines, railways and travel operators;
- Hotels and tourism organisations;
- Sports academies and training centres;
- Disaster-relief organisations;
- Religious and pilgrimage organisations; and

- Exporters, distributors and private-label buyers.

Institutional procurement can provide the Company with recurring volume-based demand in addition to ordinary retail sales.

International Market Potential

The international opportunity is equally relevant. Indian cuisine enjoys a strong consumer base among the Indian diaspora, students, working professionals and travellers living abroad.

The presence of approximately **12.5 lakh Indian students studying overseas** alone illustrates one important segment of potential international demand.

In addition, the Ministry of External Affairs records a large overseas Indian population across countries such as the United States, Canada, Australia, the United Kingdom, Gulf countries and several other markets.

Ready-to-Eat Indian products can therefore cater not only to Indian consumers abroad but also to the growing international acceptance of Indian cuisine.

The products' convenience, ease of transportation and simple preparation method make them suitable for export distribution through supermarkets, ethnic-food stores, online channels, student markets and institutional buyers, subject to destination-country food regulations.

Changing Lifestyle and the Convenience Economy

A significant structural driver behind the Ready-to-Eat category is the changing lifestyle of Indian consumers.

Modern households increasingly include working professionals, nuclear families, students, frequent travellers and consumers with limited time for traditional cooking. At the same time, consumers increasingly expect food to combine **speed, taste, hygiene, portability and affordability**.

The Company's three-minute preparation model directly addresses this requirement. It allows a consumer to keep a meal available at the office, hostel, workplace, while travelling or at home and prepare it at the time of requirement without extensive cooking infrastructure.

The absence of added preservatives, combined with hygienic manufacturing and suitable packaging technology, further supports the Company's positioning toward consumers seeking convenient food without unnecessary compromise on quality.

Market Opportunity for Unitrade Ventures Private Limited

The market opportunity for Unitrade Ventures Private Limited therefore arises from the convergence of several large consumer groups:

2+ crore railway passengers travelling every day, a higher-education population of approximately **4.46 crore students**, around **12.5 lakh Indian students studying overseas**, over **4.14 crore recorded interstate migrant workers**, expanding air-passenger traffic, a large defence establishment and a growing population of professionals, travellers, sportspersons and institutional consumers.

These groups should not be added together as a single market-size figure because there is significant overlap between them; however, each independently demonstrates the breadth and diversity of potential demand.

The Company accordingly envisages a **multi-channel business model encompassing retail, institutional supply, travel-related sales, e-commerce, modern trade, export markets and bulk procurement**.

Its current range—**Poha, Upma, Dal-Chawal, Rajma-Jeera Rice, Chole Chawal and Veg Biryani**—combines familiar Indian cuisine with the convenience required by today's mobile consumer.

In essence, the Company's market proposition is simple but far-reaching: **to make a hygienic and satisfying Indian meal accessible wherever the consumer may be—at**

work, in a hostel, on a journey, at a remote posting, during training, in an emergency or thousands of kilometres away from home.

This broad applicability, coupled with India's massive and increasingly mobile consumer base, provides a strong foundation for the sustained growth of the Ready-to-Eat food segment and creates significant domestic as well as international market potential for **Unitrade Ventures Private Limited**.

SUMMARY / CONCLUSION

- **Unitrade Ventures Private Limited** is fully equipped with a dedicated team, operational capability and supply network to undertake food-related assignments with complete commitment and professional execution.

- Our Ready-to-Eat and food product portfolio is supported by quality systems, regulatory compliance and a strong focus on hygiene, reliability and timely delivery.

- We have the capability to execute supply requirements across India and can efficiently cater to Institutional, Government, Defence, Railways, Educational and other large-scale requirements.

- The Company is prepared to customise its products, packaging, quantities and supply model in accordance with the specific requirements of the concerned Department.

- Our objective is to build a long-term and dependable association by delivering quality products, disciplined execution and consistent service wherever required,

  Company undertakes that all activities and procurement under the proposed engagement shall be carried out strictly in accordance with the prescribed guidelines. In particular, the Company shall ensure that at least 50% of its raw material procurement is sourced from eligible Farmer Producer Organizations (FPOs) formed under the Scheme for Formation and Promotion of 10,000 FPOs of the Department of Agriculture & Farmers Welfare, Member Cooperative Societies of NAFED, Self-Help Groups promoted by the Government of India under the National Rural Livelihood Mission, and millet-centric startups and Micro Food Processing Enterprises promoted by the Government of India and NAFED under the PMFME Scheme and IYM-2023. The Company is fully committed to adhering to these procurement norms in letter and spirit and to supporting farmers, cooperatives, SHGs, rural enterprises and millet-based food ecosystems through its operations.

We request an opportunity to work with your esteemed Department. Kindly entrust us with any suitable assignment or supply requirement; our entire team is ready to undertake the responsibility with complete dedication and ensure timely and reliable supply anywhere across India.

We look forward to being given an opportunity to demonstrate our capability, quality and commitment through our performance

Good Food for a Better Tomorrow
