Branded Hybrid Seeds

BEAN PHASEOLUS VULGARIS

RESEARCH - 66

First Picking : 40 to 45 days
Fruit Length : 15-18 cm
Fruit Colour : Green

- Attractive string less & smooth fruit.
- Good for transportation.
- Attractive fruit colour.
- Plants are bushy & strong.
- Medium early maturity.

RESEARCH NIRMALA

First Picking : 40 to 45 days
Fruit Length : 16-18 cm
Fruit Colour : Attractive Green

- Attractive string less & smooth fruit.
- Good for transportation.
- Attractive fruit colour.
- Plants are bushy & strong.
- Medium early maturity.

RESEARCH ROZY (ANUPAMA)

First Picking : 40 to 45 days
Fruit Length : 18-20 cm
Fruit Colour : Dark Green

- Black seeded.
- Bushy, Semi Dwarf with green leaves.
- Attractive string less & smooth fruit.
- Good for transportation.
- Tolerant to leaf rust.
- Medium early maturity.

RESEARCH DURGA 999

First Picking : 40 to 45 days
Fruit Length : 18-20 cm
Fruit Colour : Green

- Bushy, Semi Dwarf with green leaves.
- Attractive string less & smooth fruit.
- Good for transportation.
- Tolerant to leaf rust.
- Medium early maturity.

Seedways
Branded Hybrid Seeds

BEAN PHASEOLUS VULGARIS

RESEARCH SHAYAMLI

First Picking : 42 to 45 days
Fruit Length : 15-18 cm
Fruit Colour : Attractive Green

- Attractive string less & smooth fruit.
- Good for transportation.
- Attractive fruit colour.
- Plants are bushy & strong.
- Medium early maturity.
- Optimum for Fresh Market.

RESEARCH MANVI
(POLE BEAN BLACK)

First Picking : 45 to 50 days
Fruit Length : 18-20 cm
Fruit Colour : Green Round with Stringless type character

- Attractive string less & smooth fruit.
- Good for transportation.
- Attractive fruit colour.
- Pods are Lustrous in character
- Plants are bushy & strong.

RESEARCH MENKA
(POLE BEAN WHITE SEEDED)

First Picking : 45 to 50 days
Fruit Length : 16-18 cm
Fruit Colour : Light Green

- Attractive string less & smooth fruit.
- Good for transportation.
- Attractive fruit colour.
- Plants are bushy & strong.
- Good for fresh market.
- Plant Height upto 6 to 7 Feet.

RESEARCH BEAN USA

First Picking : 40 to 45 days
Fruit Length : 18-22 cm
Fruit Colour : Green

- Strong stem type plant.
- Attractive string less & smooth fruit.
- Good for transportation.
- Attractive fruit colour.
- Plants are bushy & strong.
- Good for fresh market.
- Plant Height upto 6 to 7 Feet.

BEET ROOT & EUCALYPTUS

Seedways
Branded Hybrid Seeds

IMPORTED BEETROOT RUBY QUEEN

IMPORTED BEETROOT SUMAN

F1 BEETROOT VEDANT

First Picking	:	65 to 75 days
Fruit Weight	:	100 to 120 gms.
Colour	:	Dark Red
Plant Vigour	:	Good

- Excellent field holding and wide adaptability.
- Good for juice fruit.
- Foliage is medium dull green with maroon tinge.
- Crispy and tasty.
- Good keeping quality.
- Shape Round.
- Good for fresh market.

EUCALYPTUS AFRICAN

EUCALYPTUS ROCKY

Seedways
Branded Hybrid Seeds

BITTER GOURD MOMORDICA CHARANTIA

F1 KUBER

First Picking : 55 to 60 days
Fruit Length : 15-18 cm
Fruit Colour : Dark Green
Diameter : 2-3 cm

- Dark Green high yielding variety.
- Spiny.
- Fruits weight 100-110 gms.
- Useful in summer & rainy season.

F1 RUCHI

First Picking : 40 to 45 days
Fruit Length : 10-12 cm
Fruit Colour : Green
Diameter : 3-3.5 cm

- High yielding variety with strong vigor, early maturing hybrid.
- Fruits are with blocky to semi spindle to smooth shape.

F1 SALEEM

First Picking : 50 to 55 days
Fruit Length : 22-24 cm
Fruit Colour : Dark Green
Diameter : 5-5.5 cm

- Dark Green high yielding variety.
- Spiny.
- Fruits weight 150-180 gms.
- Useful in summer & rainy season.

F1 VIKRANT-2018

First Picking : 55 to 60 days
Fruit Length : 20-25 cm
Fruit Colour : Dark Green
Diameter : 5-5.5 cm

- Glossy Dark Green with small, shiny curds.
- Uniform firmness in fruit.
- Fruits weight 200-280 gms.
- Ideal for Transportation.

Seedways
Branded Hybrid Seeds

BITTER GOURD MOMORDICA CHARANTIA

F1 RAJAT

First Picking : 55 to 60 days
Fruit Length : 20-25 cm
Fruit Colour : White (Light Green)

- Fruit Weight 120-140 gms.
- Vigorous green plant with vigorous vines and light green foliage.

F1 7712

First Picking : 50 to 55 days
Fruit Length : 15-17 cm
Fruit Colour : Dark Green
Diameter : 4-4.5 cm

- Dark Green high yielding variety.
- Spineless Spindle Shape Dark Green Fruit.
- Plant with good vigour with strong stem.
- Ideal for Fresh Market.

F1 8824

First Picking : 45 to 50 days
Fruit Length : 22-24 cm
Fruit Colour : Dark Green
Diameter : 2-3 cm

- Dark Green high yielding variety.
- Medium Spiny
- Fruits weight 150-180 gms.
- Useful in summer & rainy season.

Branded Hybrid Seeds

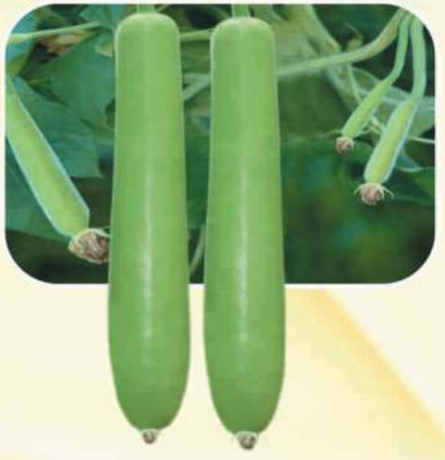

BOTTLE GOURD LAGENARIA SICERARIA

F1 BARKHA (LATTU)

First Picking : **50 to 55 days**
Fruit Colour : **Medium Green**

- Vigorous & Prolific fruit setting with early fruit character variety.
- Oval round with Slight neck shape.
- Weight around 1 kg. to 1.3 kg.
- Useful for long distance transportation.

F1 PRAGATI-11

First Picking : **60 to 65 days**
Fruit Length : **40-45 cm**
Fruit Colour : **Attractive Green**

- High yielding variety with vigorous veins with average weight 600 to 800 gms.
- Long tapered neck ideal for fresh market and for long distance transportation.

F1 MAHARANI SW-14

First Picking : **45 to 50 days**
Fruit Length : **32-37 cm**
Fruit Colour : **Attractive Green**

- Vigorous veins with high yielding variety.
- Shining Green fruit, Cylindrical Long.
- Optimum for fresh market.

F1 BHARTI-115

First Picking : **45 to 55 days**
Fruit Length : **40-45 cm Cylindrical Shape**
Fruit Colour : **Attractive Shining Green**

- Attractive Green with vigorous veins.
- Uniformity in fruit.
- Fruit weight 500-600 gms.
- Ideal for Fresh Market.
- Good for Long Distance Transportation.

Branded Hybrid Seeds

BOTTLE GOURD LAGENARIA SICERARIA

F1 HIMANI

First Picking : 55 to 60 days
Fruit Length : 25-30 cm
Fruit Colour : Green

- Vigorous & Prolific fruit setting with Cylindrical Fruit Shape.
- Weight around 650-700 gms.
- Useful for long distance transportation.
- Optimum for Fresh Market.
- Thick flesh.

F1 TANYA 2828

First Picking : 50 to 60 days
Fruit Length : 25-30 cm
Fruit Colour : Attractive Green

- Small Seeded
- Vigorous & Prolific fruit setting with Cylindrical Fruit Shape.
- Weight around 600-800 gms.
- Useful for long distance transportation.
- Optimum for Fresh Market.

F1 PREMIUM SW-18

First Picking : 45 to 50 days
Fruit Length : 32-37 cm
Fruit Colour : Attractive Green

- Vigorous veins with high yielding variety.
- Shining Green fruit, Cylindrical Long.
- Medium thick flesh.
- Optimum for fresh market.

Branded Hybrid Seeds

BRINJAL SOLANUM MELONGENA

F1 BHIM

Maturity Period	:	45 to 50 days
Fruit Shape	:	Erect Tall
Fruit Weight	:	100-120 gm.
Fruit Colour	:	Purple with green calyx

- High yielding variety for summer & Rainy Season
- Good for fresh market.

F1 PPL 47

Maturity Period	:	50 to 55 days
Fruit Shape	:	Thin Long
Fruit Weight	:	100-125 gm.
Fruit Colour	:	Deep Purple with green calyx

- Plant habit is erect in Character.
- Plant with Bushy & Well Branched Habit.
- Good for transportation.

F1 KANCHAN 75

Maturity Period	:	55 to 60 days
Fruit Shape	:	Round Big
Fruit Weight	:	250-400 gm.
Fruit Colour	:	Deep Purple with green calyx

- Long Duration Variety.

F1 SW KIRTI 99

Maturity Period	:	50 to 55 days
Fruit Shape	:	Thin Long
Fruit Weight	:	100-125 gm.
Fruit Colour	:	Deep Purple with black tone, with green calyx

Seedways
Branded Hybrid Seeds

BRINJAL SOLANUM MELONGENA

F1 SIKANDER

Maturity Period : 60 to 65 days
Fruit Shape : Slightly Oval Round
Fruit Weight : 250-300 gm.
Fruit Colour : Purple with pinkish green calyx

- Plant habit with erect with non spiny & round in shape.
- Plant with single bearing habit.
- Good for transportation.

F1 GREEN CROSS

Maturity Period : 55 to 60 days
Fruit Shape : Long
Fruit Weight : 100-120 gm.
Fruit Colour : Grey with green calyx

- Plant habit with semi erect.
- Good for transportation.

F1 ANGEL

Maturity Period : 60 to 65 days
Fruit Shape : Oval Cluster
Fruit Weight : 80-90 gm.
Fruit Colour : Purple with green calyx

- Plant habit with semi erect.
- Good for transportation.

F1 WHITE HOUSE

Maturity Period : 55 to 60 days
Fruit Shape : Oval
Fruit Weight : 70-80 gm.
Fruit Colour : White with green calyx

- Plant habit with semi erect.
- Good for transportation.

Seedways
Branded Hybrid Seeds

BROCOLI BRASSICA OLERACEA VAR. ITALICA

F1 TOMTOM

First Period : 85 to 90 days (After Transplant)
Fruit Shape : High Dome Shape
Fruit Colour : Dark Green

- Medium Maturing Hybrid Comes After 85 Days After Transplanting With Fine And Dark Green Beads With High Domed Shaped Head Shape.
- Good For Fresh Market.

F1 SUNNY

Maturity Period : 70 days After Transplant
Fruit Shape : Dome
Fruit Weight : 250-300 gm
Fruit Colour : Dark Green

- Plant Grows Upright with Strong Vigor in Habit.
- Uniformity in the Curd.
- Good for fresh market.

F1 BOBBY

First Period : 60 to 65 days (After Transplant)
Fruit Shape : Compact
Fruit Colour : Fine Green

- Early maturing hybrid comes after 65 days after transplanting with fine and blue green beads with high domed shaped head.
- Good for fresh market.

F1 JESSICA

Maturity Period : 60 to 65 days (After Transplant)
Fruit Shape : Compact
Fruit Colour : Fine Green

- Early maturing hybrid comes after 65 days after transplanting with fine and blue green beads with high domed shaped head.
- Good for fresh market.

Seedways
Branded Hybrid Seeds

CABBAGE CUCUMIS SATIVUS

F1 ANJALI-66

First Period : **65 days (After Transplant)**
Fruit Shape : **Semi Globe**
Fruit Colour : **BLUEISH Green**

- Semi Globe headed with 65-70 days after transplant.
- Fruit weight 1.9-2.1 kg.
- Resistant to black rot.

F1 SUNNY

Maturity Period : **60 days (After Transplant)**
Fruit Shape : **Globe**
Fruit Colour : **Attractive Green**

- Globe headed with 60 after transplant.
- Fruit weight 1.5-2.1 kg.
- Resistant to black rot.
- Tolerance to heat & cracking.

F1 GOLDY BALL 66

First Period : **60 to 65 days (After Transplant)**
Fruit Shape : **Globe**
Fruit Colour : **BLUEISH Green**

- Can be harvested 60-65 days after transplanting.
- Resistance to cracking.
- Dark green colour.
- Fruit weight 1.3-1.5 kg.

F1 RAJNI

Maturity Period : **75 - 80 days (After Transplant)**
Fruit Shape : **Semi Globe**
Fruit Colour : **Deep Green**

- Tolerant to Black Rot.
- Can be harvested 75-80 days after transplanting.
- Deep green colour
- Fruit weight 2-2.5 kg.
- Suitable for cold climate.

Seedways
Branded Hybrid Seeds

CABBAGE CUCUMIS SATIVUS

F1 JOY 55

First Period : **50-53 days (After Transplant)**
Fruit Shape : **Globe Head**
Fruit Colour : **Attractive Green**

- Early maturing hybrid can be harvested after 50-53 days after transplanting
- with Globe shape head.
- Fruit weight 0.8-1.25 kg.
- Curd shape is compact.

F1 AMAZE

Maturity Period : **75-80 days (After Transplant)**
Fruit Shape : **Semi Globe Head**
Fruit Colour : **Dark Green**

- Medium Large Size Shape Semi Globe Good Good Field Holding Capacity.
- Fruit Weight 2-2.5 Kg.
- Late Bursting.
- Tolerance To Cold.
- Tolerance To Black Rot.

F1 LALITA

First Period : **60 days (After Transplant)**
Fruit Shape : **Flat**
Fruit Colour : **Medium Green**

- Harvested 60 days after transplanted.
- Fruit weight 1.5-2 kg.
- Good heat tolerance.
- Good for transportation.

IMPORTED GOLDEN ACRE

Maturity Period : **62 days (After Transplant)**
Fruit Shape : **Globe**
Fruit Colour : **Medium Green**

- Early round head fruit.
- Head diameter 6-7 inches.
- Compact plant with medium green head.
- Good for fresh market.

Seedways
Branded Hybrid Seeds

CARROT CUCUMIS SATIVUS

IMPORTED KURODA
MAYA

- Deep Orange in colour with
- Cylindrical Round Shoulders.
- Maturity after 110-120 days of sowing.
- Length around 15-18 cm.
- Resistant to cracking.
- Optimum for fresh market.

F1 EARLY NANTES
JOCKEY

First Picking : **110 to 115 days**
Fruit Length : **18-20 cm**
Fruit Colour : **Orange**
Diameter : **3-4 cm**

- Resistant to cracking.
- Orange Fruit with Cylindrical Shape.
- Juicy.
- Good for Fresh Market.

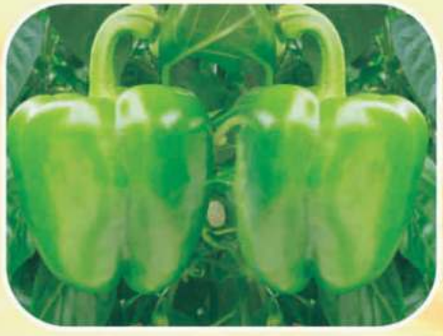

IMPORTED
EARLY NANTES

- Orange In Colour With Cylindrical Fruit
- High Yielding Variety With Uniform Roots.
- Maturity After 120 Days Of Sowing.
- Length Around 18-22 Cm
- Resistant To Cracking.
- Optimum For Fresh Market.

Branded Hybrid Seeds

CAPSICUM CAPSICUM ANNUUM

F1 GREEN DIAMOND

First Picking : 50-55 days (After Transplant)
Fruit Shape : Blocky
Fruit Colour : Dark Green

- Dark green fruit thick walled.
- Average weight 150-180 gm.
- Length of the fruit is 12 cm. with grith of 10 to 12 cm. with 3 to 4 lobs.
- Plant with medium tall with bushy plants with vigrous growth.
- Fruit with long shelf life.
- Ideal for fresh market.

F1 AMBASSADOR

First Picking : 50-55 days (After Transplant)
Fruit Shape : Blocky
Fruit Colour : Dark Green

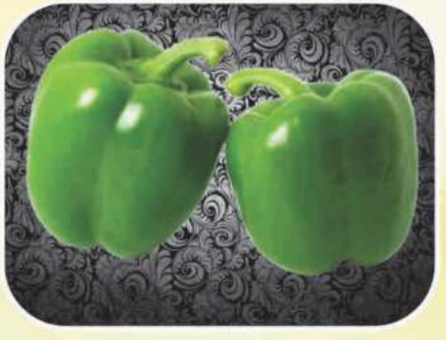

- Dark green fruit thick walled.
- Average weight 120-140 gm.
- Length of the fruit is 12 cm. with grith of 10 to 12 cm. with 3 to 4 lobs.
- Plant with medium tall with bushy plants with vigrous growth.
- Fruit with long shelf life.
- Ideal for fresh market.

F1 ANJANA

First Picking : 65-70 days (After Transplant)
Fruit Shape : Blocky
Fruit Colour : Green to Yellow

- Plant with medium tall height & medium spreading.
- Green fruit thick walled.
- Average weight 150-160 gm.
- Plant with long duration with fruit character.
- Fruit with long shelf life.
- Ideal for fresh market.
- Good for long distance transportation.

F1 BARCELONA

First Picking : 65-70 days (After Transplant)
Fruit Shape : Blocky
Fruit Colour : Dark Green

- Plant height 3-4 feet.
- Dark green fruit thick walled.
- Average weight 120-140 gm.
- Length of the fruit is 12 cm. with grith of 10 to 12 cm. with 3 to 4 lobs.
- Plant are vigrous in character.
- Fruit with long shelf life.
- Ideal for fresh market.
- Good for long distance transportation.

MARIGOLD TAGETES

F1 MARIGOLD TOLSTOI

- First harvest 35-40 days after transplanting.
- Early vigrous much branching with flower diameter of 10-12 cm, colour deep orange, no. of plant per acre 9500-10000.
- Uniform plant set.
- Good for keeping 2-3 days after harvesting.

F1 MARIGOLD MONALISA

- First harvest 35-40 days after transplanting.
- Early vigrous much branching with flower diameter of 10-12 cm, colour deep yellow, no. of plant per acre 9500-10000. • Uniform plant set. Ability to keep 4-5 days after harvesting.

RESEARCH MARIGOLD RAHUL

- First harvest 40-45 days after transplanting.
- early vigrous much branching with 2 to 2.5 feet tall producing deep orange compact flower.

Branded Hybrid Seeds

OKRA ABELMOSCHUS ESCULENTUS

F1 ANMOL

First Picking : 45 to 50 days
Fruit Length : 10-14 cm.
Fruit Colour : Dark Green

- Fruits are dark green colour and have uniformity in shape and size.
- Long harvesting period.
- High yield potential.
- Good for fresh market & long distance transportation.

F1 JASSI-5591

First Picking : 45 to 50 days
Fruit Length : 11-13 cm.
Fruit Colour : Green

- Fruit with vigorous medium long slender with 5 ridges.
- Plant with medium cut leaves.
- Tolerance to YVMV.
- Long harvesting period.
- High yield potential.
- Good for fresh market & long distance transportation.

F1 TULSI 71

First Picking : 42 to 45 days
Fruit Length : 12-14 cm.
Fruit Colour : Green

- Fruit with vigorous medium long slender with 5 ridges.
- Plant with medium cut leaves.
- Tolerance to YVMV & Curl leave virus.
- Long harvesting period.
- High yield potential.
- Good for fresh market & long distance transportation.

F1 FAMOUS 71

First Picking : 45 to 50 days
Fruit Length : 11-13 cm.
Fruit Colour : Dark Green

- Medium tall plant with deep cut leaves.
- Fruit with green smooth with uniformity in shape and size.
- Tolerance to YVMV.
- Long harvesting period.
- High yield potential.
- Good for fresh market & long distance transportation.

Seedways
Branded Hybrid Seeds

OKRA ABELMOSCHUS ESCULENTUS

F1 SHIVANI 75

First Picking : 42 to 47 days
Fruit Length : 11-13 cm.
Fruit Colour : Green

- Fruit with vigorous medium long slender with 5 ridges.
- Plant with medium cut leaves.
- Tolerance to YVMV.
- Long harvesting period.
- High yield potential.
- Good for fresh market & long distance transportation.

RES.
LUCKY 666

F1 SHRISHTY 77

First Picking : 42 to 45 days
Fruit Length : 10-12 cm.
Fruit Colour : Dark Green

- Fruit with dark green lustrous.
- Plant with medium, tall, bushy plant with 2-3 lateral branches.
- Tolerance to YVMV.
- Long harvesting period.
- High yield potential.
- Good for fresh market & long distance transportation.

RES.

PEAS CUCUMIS SATIVUS

GREEN PEARL S-10

- Medium early maturity.
- 9-10 seeds per pod.
- Long pod size.
- Two pod per node.
- Strong against diseases.
- Good for fresh market.
- Good for long distance transportation.

SW 4400

- Medium maturity.
- 10 seeds per pod.
- Long pod size.
- Two pod per node.
- Strong against diseases.
- Good for long distance transportation.

IMPORTED KARISHMA

- Medium maturity.
- High yielding.
- 10-11 seeds per pod.
- Long & thick pod size.
- Two pod per node.
- Strong against diseases.
- Good for long distance transportation.

GREEN PEARL SW 20

- Medium early maturity.
- High yielding.
- 10-11 seeds per pod.
- Long & thick pod size.
- Two pod per node.
- Strong against diseases.
- Good for long distance transportation.

Seedways
Branded Hybrid Seeds

PUMPKIN CUCUMIS SATIVUS

F1 TASTY

First Picking : 70 to 75 days
Fruit Weight : 2-5 to 4 kg.
Fruit Colour : Molted Green

- Medium early maturity.
- Round to flatish round.
- Medium size high yielding variety .
- Vigrous growth.
- Good for fresh market.

F1 MARUTI

First Picking : 65 to 70 days
Fruit Weight : 2-5 to 4 kg.
Fruit Colour : Molted Green

- Medium early maturity.
- Vigrous growth.
- Shape flat round.
- Good for fresh market.

F1 PUMPKIN BABAR

First Picking : 70 to 75 days
Fruit Weight : 5 to 8 kg.
Fruit Colour : Blackish green with elongated cream spots

- Orange yellow flash.
- High yielding variety.
- Plant with medium long vines.
- Optimum for fresh market.
- Good for long distance transportation.

RES. PUMPKIN SNOW BABY

Seedways
Branded Hybrid Seeds

RADISH RAPHANUS RAPHANISTRUM

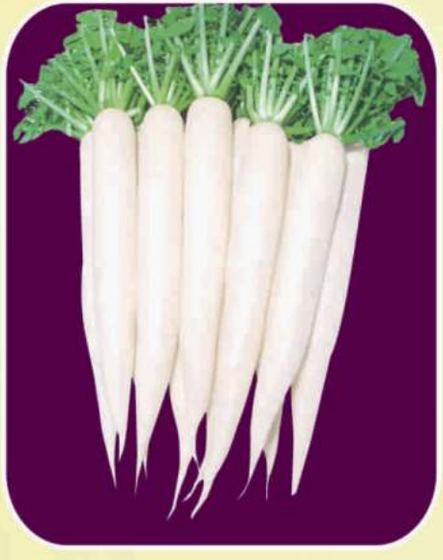

F1 AISHWARYA

Fruit Colour : Attractive White

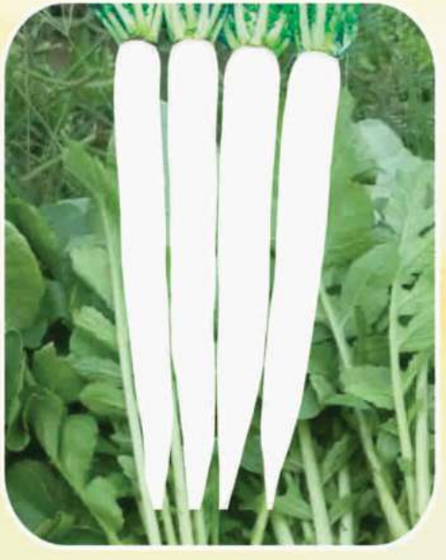

- Early maturity variety of 40 to 50 days.
- Length 10-12 inch.
- Average weight 600-800 gms.
- Roots can stay in the soil for long time after the maturity also.
- Plant roots are smooth and fine in shape.
- Optimum for fresh market.
- Fruits are whte in colour and have uniformity in shape and size.
- Good for fresh market & long distance transportation.

SPINACH ABELMOSCHUS ESCULENTUS

F1 MANJU

First Picking : 42-47 days
Fruit Colour : Green

- Lustrous leaves
- Leaves did not turn hard after various cutting.
- Fruit with vigorous medium long slender with 5 ridges.
- Plant with medium cut leaves.
- Tolerant to YVMV.
- Long harvesting period.
- High yield potential.
- Good for fresh market & long distance transportation.

RESEARCH NISHA PAHARI PALAK

RES. RADHIKA

First Picking : 42-45 days
Fruit Colour : Dark Green

- Fruit with dark green lustrous.
- Plant with medium, tall, bushy plant with 2-3 lateral branches.
- Tolerant to YVMV.
- Long harvesting period.
- High yield potential.
- Good for fresh market & long distance transportation.

RESEARCH GOLDEN CROWN

Seedways
Branded Hybrid Seeds

SPONGE GOURD LUFFA AEGYPTIACA

F1 SONIA

First Picking : 35 to 40 days
Fruit Length : 22-24 CM
Fruit Colour : Dark Green

- Good growth and branching
- High disease resistant.
- Long harvesting period.
- Weight 200-220 gms.
- Cylindrical shape.
- Fruits are dark green colour and have uniformity in shape and size.
- Good for fresh market & long distance transportation.

F1 RADHIKA

First Picking : 42 to 45 days
Fruit Length : 18-22 CM
Fruit Colour : Dark Green

- Fruit with dark green lustrous.
- Plant with medium, tall, bushy plant with 2-3 lateral branches.
- Tolerant to YVMV.
- Long harvesting period.
- High yield potential.
- Good for fresh market & long distance transportation.

F1 SPONGE GOURD SANAM

First Picking : 45 to 50 days
Fruit Length : 20 to 24 cm.
Fruit Colour : Dark Green

- High profilic variety.
- Early fruit set.
- Good growth and branching
- High disease resistant.
- Long harvesting period.
- Weight 100-150 gms.
- Good for fresh market & long distance transportation.

F1 MILKY WHITE

First Picking : 50 to 55 days
Fruit Length : 25-28 cm
Fruit Colour : Whitish Green

- Light green fruit with vigrus with high yielding variety.
- White seeded.
- Medium vigrus habit.
- Optimum for fresh market.

Seedways
Branded Hybrid Seeds

SQUASH & SEEDLESS CUCUMBER (PARTHENOCARPIC)

F1 MUBARAK

First Picking : 40 to 45 days
Fruit Length : 25-30 CM
Fruit Colour : Dark Green

- Good growth and branching.
- High disease resistant.
- Long harvesting period.
- Weight 200-220 gms.
- Cylindrical shape.
- Fruits are dark green colour and have uniformity in shape and size.
- Good for fresh market & long distance transportation.

F1 TOM TOM

First Picking : 40 to 45 days
Fruit Length : 18-22 CM
Fruit Colour : Dark Green

- this variety is strong high quality shiny green fruit, very high fruit setting with uniform fruit character resistance to disease package.

F1 CRYSTAL
(SEEDLESS CUCUMBER)

- High profilic variety.
- Suitable for growing in green house.
- Parthenocarpic with all female fruits.
- Single fruit habit.
- Fruit are 18-19 cm long.
- Suitable for fresh market grown in green house.

F1 POSEIDON
(SEEDLESS CUCUMBER)

- High profilic variety.
- Suitable for growing in green house.
- Fruit are 17-19 cm long.
- Fruit come in clusters.
- Parthenocarpic with all female fruits.
- Suitable for fresh market grown in green house.

Branded Hybrid Seeds

TOMATO SOLANUM LYCOPERSICUM

F1 DON 87

First Picking : 65 to 70 days
Fruit Type : Flat Round
Fruit Colour : Attractive Red

- Semi determinate variety.
- Fruit weight 80-90 gms.
- Fruits are uniformity in shape.
- High yielding variety. • Green shoulder

F1 KANIKA-0092

First Picking : 55 to 60 days
Fruit Type : Round
Fruit Colour : Attractive Red

- Semi determinate variety, white shoulder.
- Fruit weight 85-95 gms.
- Fruits are uniformity in shape.
- High yielding variety.

F1 RISHI-85

First Picking : 55 to 60 days
Fruit Type : Flat Round
Fruit Colour : Glossy Red

- Semi determinate variety, green shoulder.
- Fruit weight 80-90 gms. • Strong plant type.
- Medium maturity. • High yielding variety.
- Fruits are uniformity in shape.

F1 SURYA

First Picking : 55 to 60 days
Fruit Type : Apple Round
Fruit Colour : Glossy Red

- Semi determinate variety, white shoulder.
- Fruit weight 90-100 gms. • Strong plant type.
- Medium maturity. • High yielding variety.
- Fruits are uniformity in shape.

F1 ABHIJEET

First Picking : 60 to 65 days
Fruit Type : Oval
Fruit Colour : Deep Red

- Semi determinate variety.
- Fruit weight 90-100 gms.
- Fruits are uniformity in shape.
- High yielding variety. • Good Foliage cover.

F1 YUVRAJ

First Picking : 65 to 70 days
Fruit Type : Oval
Fruit Colour : Attractive Deep Red

- Tall determinate variety, strong vigor.
- Fruit weight 90-100 gms.
- Light green shoulder. • High yielding variety.
- Tolerant to leaf curl virus.

F1 HILL SONA

First Picking : 60 to 65 days
Fruit Type : Flat Round
Fruit Colour : Deep Red

- Indeterminate variety, green shoulder.
- Fruit weight 90-100 gms.
- Early hybrid suitable for long distance transportation. • Fruits are uniformity in shape.

F1 RED DIAMOND

First Picking : 55 to 60 days
Fruit Type : Flat Round
Fruit Colour : Glossy Red

- Indeterminate variety, green shoulder.
- Fruit weight 90-100 gms.
- Early hybrid suitable for long distance transportation. • Fruits are uniformity in shape.

Branded Hybrid Seeds

TOMATO SOLANUM LYCOPERSICUM

F1 TURBO 45

First Picking : **60 to 65 days**
Fruit Type : **Oval**
Fruit Colour : **Deep Red**

- Semi determinate variety.
- Fruit weight 85-90 gms. • Heat tolerant variety with strong plant and broad leaves type.
- Good for fresh market & long distance transportation. • High yielding variety.

F1 SARTAJ 2255

First Picking : **60 to 70 days**
Fruit Type : **Oval**
Fruit Colour : **Deep Red**

- Determinate variety. • Fruit weight 90-100 gms.
- Very high heat set, resistant to LCV.
- Medium early maturity with good firmness.
- Good for fresh market & long distance transportation. • High yielding variety.

RES. VISHNU (NAVODYA)

F1 KAREENA

First Picking : **55 to 60 days**
Fruit Type : **Flat Round**
Fruit Colour : **Glossy Red**

- Vigrous fruiting with firmness in fruit with uniformity .
- Strong plant type. • Semi determinate variety, green shoulder. • Fruit weight 90-110 gms.
- Medium maturity. • High yielding variety.

WATER MELON CUCUMIS SATIVUS

F1 SHARUKH 786™

First Picking : **60 to 65 days**
Fruit Weight : **5-7 kg.**
Fruit Colour : **Dark Green**

- Good growth and branching.
- High disease resistant.
- Long harvesting period.
- Weight 5-7 kg.
- Oval shape.
- Fruits are dark green colour and have uniformity in shape and size.
- Good for fresh market & long distance transportation.

F1 ARUNA 0035

First Picking : **65 to 70 days**
Fruit Weight : **2.5-3.5 Kg.**
Fruit Colour : **Black (Dark Green)**

- Plant with dark green fruit with powdery character .
- High yield variety for winter & rainy season. • Medium early maturity.
- Fruits are green in colour and have uniformity in shape and size
- Tolerance to wilt disease.
- Good for fresh market & long distance transportation.

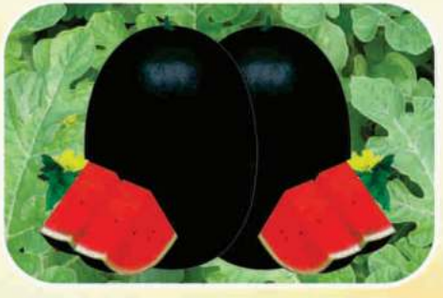

WATER MELON ICE BOX - TSS 12% To 14%

F1 SUPER KALA

First Picking : **60 to 65 days**
Fruit Typle : **Oval Shape**
Fruit Colour : **Deep Black Green**

- Indeterminate variety, green shoulder.
- Fruit weight 6-8 kg.
- Medium hybrid maturity suitable for long distance transportation.
- Fruits are uniformity in shape.

F1 ARIF

First Picking : **60 to 65 days**
Fruit Colour : **Dark Black Green**

- Good growth and branching.
- High disease resistant.
- Weight 4-6 kg.
- Oval shape.
- Fruits are dark green colour and have uniformity in shape and size.
- Good for fresh market & long distance transportation.

WATER MELON CUCUMIS SATIVUS

F1 SACHIN

First Picking : 65-70 days
Fruit Shape : Attractive Jubilee Oval Shape
Fruit Colour : Pied Green

- Good growth and branching with dense plant.
- High disease resistant.
- Long harvesting period.
- Weight 8-10 kg.
- Oval shape. • Small brown seeded variety.
- Ripens in 65-70 days.
- Good for fresh market & long distance transportation.
- Sweetness is 12% to 15% TSS.

F1 BADSHAH-786

First Picking : 65-70 days
Fruit Shape : Attractive Jubilee Oval Shape
Fruit Colour : Pied Green

- Good growth and branching with dense plant.
- High disease resistant.
- Long harvesting period.
- Weight 8-10 kg.
- Oval shape.
- Ripens in 70-75 days.
- Good for fresh market & long distance transportation.

F1 WATERMELON-295

First Picking : 80-90 days
Fruit Shape : Attractive Jubilee Oval Shape
Fruit Colour : Pied Green

- Good growth and branching with dense plant.
- High disease resistant.
- Long harvesting period.
- Weight 10-12 kg. • Oval shape.
- Ripens in 80-90 days.
- Good for fresh market & long distance transportation.
- Big Seeded Crop.

F1 BIGBOSS

First Picking : 70-80 days
Fruit Shape : Attractive Jubilee Oval Shape
Fruit Colour : Pied Green

- Good growth and branching with dense plant.
- High disease resistant.
- Long harvesting period.
- Weight 8-10 kg. • Oval shape.
- Ripens in 75-80 days.
- Good for fresh market & long distance transportation.
- Small Brown Seeded Crop.
