MWL 21C5

Soluble Cutting Oil

Product Description

MWL 21C5 *is a mineral oil/amine based water-soluble cutting fluids are designed to help offer long service life, have low maintenance requirements and be suitable for a wide range of materials and operations. Offering the right balance between cooling and lubricity. It is fortified with world-class EP additive, corrosion inhibitors and biocide to ensure smooth operation with* **MWL 21C5.**

MWL 21C5 *aims to deliver excellent tool life and surface finish, which can help reduce tool regrinding and component rejects. Formulated to meet the latest health and safety guidelines, the products are particularly suitable for modern machine-shop managers aiming to improve productivity and reduce machine downtime.*

5-10% solution of **MWL 21C5** *in water forms high-performance, milky soluble fluid providing excellent batch life and lubricity. Designed for long service life and a high degree of lubricity for a range of moderate- to heavy-duty applications.*

Suitable for most metals in general and heavy duty machining and grinding,

	MWL 21C5
Appearance	Clear Amber Liquid
Odor	Petroleum Odor
Viscosity @ 40°C, cSt	60-90

Pack size: 200 Litters Metal Drum
