COPG 400
Cardium Compound

Product Description
COPG 400 Cardium Compound is a viscosity, residual-type (bituminous) lubricants suitable for the lubrication of wire ropes, chains, flexible couplings, gears and sliding surfaces of drag lines and shovels, and open gears of mine hoists, ball mills, rubber mixers, cement mills, clay products industries, construction equipment, dredging equipment as well as other applications where a heavy, adhesive oil is required.

Applications
COPG 400 Cardium Compound was developed specifically to provide enhanced retention on bearing surfaces where the lubricant must withstand washing action. This product also meet the performance requirements of industrial applications.

Benefits
• Excellent wear protection under adverse conditions
• Rust protection of ferrous parts
• Resistance to water washout
• Excellent adhesion to metal surfaces

Appearance	Black
Texture	Semi-Liquid, Tacky
°API D 1298	<17.0
Viscosity @ 100°C, cSt (ISO3104)	830
Flash °C (ASTM D 92)	210Min
