A Journey from Engineering Excellence to Cosmic Sciences

With 42 years of distinguished experience in Indian and Multinational Corporate Sector in Electrical Power Engineering, Management and Construction, Acharya Kumar Ajay brings a unique blend of scientific temperament and Vedic wisdom. His inclination towards Astronomy, Celestial & Cosmic Energy and Occult Sciences led him to formally study Astrology from Bharatiya Vidya Bhavan, K.G. Marg, New Delhi - one of India's most respected institutions. During his deep research, he realized the profound and scientific connection between an individual's Horoscope, Planetary Positions, the Cosmic Energy emitted by them, and the Vastu of the dwelling. He observed how the confluence of these two energies shapes human destiny - at times bestowing happiness, good health and prosperity, and at times causing severe hardships.

To provide complete and holistic solutions, he further acquired mastery in Vastu Shastra - the mystic science of architectural energy - again from Bharatiya Vidya Bhavan.

Vision & Mission: Today, combining 42 years of corporate discipline and analytical engineering approach with authentic Vedic knowledge, he is dedicated to serving humanity. His mission is to help individuals shape their lives for better living through the scientific and practical application of Astrological and Vastu Shastra principles.
