Established **National & International Accreditation Standards** in achieving our goals of providing quality clinical care and patient services.

THE VISIONARIES, THE LEADERS

Onkar S. Kanwar

Chairman
Artemis Hospitals & Apollo Tyres Ltd.

At Artemis, we have created a sanctuary of good health. With advanced state-of-the-art technology, systems, processes and infrastructure designed to a degree of detail, that ensures comfort and satisfaction, at all times.

Driving this facility to your benefit is a team of accomplished professionals, educated at the best medical schools and skill-tested at the most respected hospitals worldwide. Complementing their expertise is their singular belief in the Artemis philosophy of adding years to life. What makes them special is their faith in their own and each other's abilities and the compassion they add to the practice of their science. At Artemis, we call it 'the art of healthcare'.

Wishing you good health and happiness!

Dr. Devlina Chakravarty

Managing Director, Artemis Hospitals

At Artemis Hospitals, our vision has always been to redefine healthcare by combining clinical excellence with genuine compassion.

We believe that true progress in medicine comes not only from advanced technology and innovation, but from an unrelenting commitment to the people we serve. Our mission is to create a healthcare ecosystem where patients feel seen, heard, and cared for — where every touchpoint reflects trust, empathy, and integrity.

Come Experience the Future of Healthcare at Artemis Hospitals

We have a host of Surgical and Non-Surgical Interventional Procedures which use some of the most advanced technologies!

OUR CENTRES OF EXCELLENCE

ARTEMIS HEART CENTRE

Artemis Heart Centre represents a new benchmark in cardiac care and surgeries. We are committed to delivering exceptional treatment through advanced, state-of-the-art technology and unmatched medical expertise. Our distinguished team of ***cardiologists, cardiothoracic surgeons, and vascular specialists*** collaborate seamlessly to provide world-class, comprehensive heart care.

Spectrum of our Services

- Complex Invasive Cardiology
- Non Invasive Cardiology
- Cardio Thoracic & Vascular Surgery
- Paediatric Cardiology
- Paediatric Cardiac Surgery

Equipped with

- Cardiac Cath Lab
- Endovascular Operating Suit
- Dedicated Cardiac OTs
- Cardiac Rehabilitation Centre

ARTEMIS CANCER CENTRE

Artemis Cancer Centre delivers next-generation cancer care, powered by some of the most advanced medical technologies available anywhere in the world. Our expertise spans seven key sub-specialties : ***Medical Oncology, Surgical Oncology, Head & Neck Surgical Oncology, Hematology & BMT, Radiation Oncology, Nuclear Medicine, and Robotic Surgery*** - ensuring comprehensive, precision-driven treatment for every patient.

What Makes Us Unique ?

- Organ Specific Onco Surgeons & Experts
- Multi-Disciplinary Tumor Board Discussions
- Comprehensive Treatment Modalities
- Cancer Screening Mobile Van

ARTEMIS AESTHETICS CENTRE

Artemis Aesthetics Centre offers comprehensive care across ***Dermatology, Cosmetology and Plastic, Reconstructive & Cosmetic Surgery***. Equipped with some of the most advanced next-generation technologies the centre delivers exceptional care.

Our Dermatology and Cosmetology Services address a full range of skin concerns - from acne, uneven pigmentation to body-related conditions including skin cancer screenings, psoriasis, and eczema, whether mild or complex.

Our Plastic, Reconstructive and Cosmetic Surgery Division focuses on restoring or enhancing the form and function of body parts affected by injury, disease, or congenital abnormalities—ensuring both precision and aesthetic excellence.

ARTEMIS NEUROSCIENCES CENTRE

Where innovation meets excellence - Artemis Neurosciences Centre stands at the forefront of advanced neurological care. Backed by state-of-the-art equipment and a distinguished faculty, ***we diagnose and treat the full spectrum of brain, spine and nerve disorders*** with unmatched precision.

Our expert team provides comprehensive treatment across four specialized units: ***Neurology, Neurosurgery, Neuro Spine and Neuro Intervention.***

ARTEMIS ORTHOPAEDICS CENTRE

Artemis Joint Replacement & Orthopaedics Centre delivers world-class care for ***bones, joints, muscles, and spine*** - helping patients of all ages regain mobility and return to an active life. With advanced surgical and non-surgical treatments, we are recognized as one of India's top hospitals for knee replacement and orthopaedics. We are covering ***arthroscopic procedures, paediatric surgeries and advanced spine treatments*** in our scope of services.

ARTEMIS MINIMALLY INVASIVE & BARIATRIC CENTRE

At Artemis Minimally Invasive & Bariatric Centre, we focus on tackling obesity with modern, evidence-based treatment strategies. ***Our expert bariatric surgeons perform the safest and most effective weight-loss procedures, using the latest medical technologies available worldwide.*** With personalized care and advanced surgical techniques, our team helps patients achieve sustainable weight loss and embrace a healthier, more active life.

Our Procedures

- Laproscopic Adjustable Gastric Band (AGB)
- Laparoscopic Roux En Y Gastric Bypass
- Endoscopic Sleeve Gastroplasty
- Gastric Sleeve Surgery
- Laparoscopic Mini Gastric Bypass
- Intra Gastric Balloon
- Allurion Gastric Balloon
- Robotic Assisted Laparoscopy

ARTEMIS GASTROSCIENCES CENTRE

Artemis Gastrosciences Centre combines state-of-the-art technology with advanced intensive care facilities to deliver world-class gastrointestinal care. Our gastroenterology specialists offer comprehensive medical and surgical services, providing ***precise diagnostics and treatment for disorders of the liver, pancreas, biliary system, and gastrointestinal tract*** in both children and adults.

The Centre also offers advanced, painless endoscopic procedures for complex conditions, including cancers, covering the esophagus, stomach, small and large intestines, liver, biliary system, and pancreas.

ARTEMIS ORGAN & TISSUE TRANSPLANT CENTRE

The Comprehensive Transplant Centre at Artemis is dedicated to delivering the best possible transplant experience for our patients. Studies show that transplant recipients enjoy a higher quality of life, fewer dietary restrictions, and reduced long-term health complications. Our expertise spans a wide range of transplants, including : **Liver, Kidney & Bone Marrow Transplant.**

ARTEMIS WOMAN & CHILD CENTRE

At Artemis Women & Child Centre, we provide ***exceptional care and advanced treatments for every mother, baby, and woman at every stage of life***. We are committed daily to enhancing the health and wellbeing of our patients.

For women, we offer comprehensive obstetric services including high-risk maternal-fetal medicine, alongside a full spectrum of gynecologic care.

For children, our specialists provide ***expert care across more than 15 disciplines,*** including adolescent medicine, cardiology, endocrinology, hematology/oncology, neurology, pulmonary medicine, critical care, and surgery. Our Level IV nursery delivers world-class care for complex and critically ill newborns, ensuring the best start for every child.

ARTEMIS PULMONOLOGY CENTRE

Artemis Pulmonology & Critical Care Centre offers ***comprehensive care for all lung and respiratory conditions***, from asthma and COPD to lung cancer and sleep disorders.

Integrated with our Critical Care Unit, our expert team provides advanced life-support treatments, including ECMO and CRRT, using the latest diagnostic and therapeutic technologies to ensure world-class respiratory care.

ARTEMIS PAIN MEDICINE CENTRE

Artemis Pain Medicine (Algology) specializes in managing chronic and cancer pain, palliative care, and end-of-life support. As the ***first corporate hospital in Delhi/NCR to offer this comprehensive program***, we put patient comfort and quality of life at the forefront.

ARTEMIS GERIATRIC MEDICINE & LONGEVITY CENTRE

A new era of healthy ageing begins at Artemis Hospitals. We proudly present our dedicated Geriatric & Longevity Clinic, tailored to address the unique health needs of older adults with expertise, compassion, and precision.

Spectrum of our Services :

- Memory and cognition
- Balance, falls, and walking issues
- Osteoporosis, bone and muscle strength
- Polypharmacy (Multiple Medications)
- Nutrition and digestion
- Mood and mental Wellness
- Continence and bladder concerns
- Longevity, vitality, and lifestyle planning

ARTEMIS HEART & LUNG TRANSPLANT CENTRE

Heart and lung conditions can significantly affect quality of life and, in advanced cases, may require life-saving organ transplants. At Artemis Hospitals, we combine advanced technology, a patient-centered approach, and a dedicated team of experts to deliver exceptional care, making us ***one of India's leading centers for heart and lung transplantation.***

Spectrum of our Services

- Thoracic Solid Organ Transplants
- VAD (Ventricular Assist Device) - (Implantable : LVAD (Heart Mate, Jarvik), RVAD, BiVAD | Temporary : Centrimag)
- ECMO
- Transplant Clinics
- Advanced Heart Failure & Transplant Cardiology
- Transplant Pulmonology

ARTEMIS CANCER CENTRE

5 Sub Specialities

Medical Oncology | Surgical Oncology | Haemato-oncology & BMT| Radiation Oncology | Nuclear Medicine

30 Plus Doctors

Our illustrious team of visionary Oncologists represents the finest in the country!

Artemis Cancer Centre is focused on providing cutting edge healthcare for cancer using the most advanced medical technology available anywhere in the world. Our specialized team of oncologists offer best cancer treatment to the patients so that they can also lead a healthy life after a proper treatment.

The multi-disciplinary cancer care, with a humane touch is offered to both the national and international patients. Artemis Cancer Centre has the unique advantage of having the entire treatment modalities under one roof.

Parameters that make our Cancer Centre Unique

Treatment Modalities
All treatments of site specific Surgery, Radiotherapy, Chemotherapy & Targeted Therapy are available.

Site Specific Clinics
A Radiation, Medical and Site Specific Surgical oncologist see the patient collectively and formulate a treatment plan. We have site specific surgeons for *Head and Neck Cancers | Thoracic Cancers | Gastrointestinal Cancers | Breast Cancers Musculoskeletal Cancers | Hepatobiliary Cancers Soft Tissue Sarcomas | Gynaecologic Cancers Oncoreconstruction*

Multi-Disciplinary Tumour Board discussions
We treat every case exclusively. Every patient diagnosed with cancer here is discussed in theTumor Board, imperatively, twice a week and a comprehensive treatment plan is agreed upon.

Under One Roof
Super Speciality Centres of Excellence for all specialities are available under the same roof.

Our Treatments, Procedures & State-of-the-Art

- **Medical Oncology -** Chemotherapy |Targeted Therapy | Immunotherapy | Hormone Therapy | Precision Oncology | NGS
- **Surgical Oncology (Organ Specific) -** Head and Neck | Breast | Gynaecological | Gastrointestinal | Thoracic | Urology | Neuro & Musculoskeletal | Reconstructive Surgery
- **Radiation Oncology -** IMRT | IGRT | Brachytherapy | Stereotactic Radiotherapy | Respiratory Gating & Electron Treatment | M6 CyberKnife
- **Nuclear Imaging -** Radionucleotide Therapies | Gamma Scintigraphy | PET–CT Scan | Metabolic Biopsies | SPECT/CT system with xSPECT technology
- **Hemato Oncology -** Thalassemia | Sickle Cell Anemia | Pure Red Cell Aplasia | Hemolytic Anemias | Hemoglobinopathies | Inherited Bone Marrow Failure Disorders | ITP | Hemophilia | Bleeding Disorders
- **Bone Marrow Transplant -** Autologous Transplantation | Allogeneic Stem Cell Transplantation | Stem Cell Therapy

ARTEMIS NEUROSCIENCES CENTRE

Our State-of-the-Art

- Advanced Biplane Neurocath lab with Rotational Angiography & Vaso CT
- Latest Generation O-ARM for complex Spine Procedures

ARTEMIS JOINT REPLACEMENT AND ORTHOPAEDICS CENTRE

12 Plus Doctors

The eminent team of Joint Replacement and Orthopaedics Centre covers the entire ambit of bone, joints and spine disorders.

Experience The Future
of Joint Replacement

Introducing
CUVIS JOINT
Robotic System For Knee Replacement Surgery

We, at **Artemis Joint Replacement & Orthopaedics Centre**, are dedicated to provide the best possible orthopaedics and spine care available for both adults and paediatrics.

We are dedicated to providing state-of-the-art care to all patients afflicted with painful bone, muscle, tendon and joint cartilage disorders. Our physicians and staff strive to facilitate our patients' return to activities that have been prevented due to musculoskeletal injuries or arthritis by employing innovative surgical and non-surgical techniques. Artemis Hospital is considered to be one of the best knee replacement and Orthopaedics hospital in India.

Speciality Care provided includes:

- Sports Medicine
- Shoulder Arthroscopy and Reconstruction
- Total Joint Reconstruction
- Foot & Ankle Reconstruction
- Hand Surgery
- Knee Arthroscopy & Reconstruction
- Spinal Surgery
- Scoliosis Management
- Non-Surgical Management of Spine and Back Pain
- Cartilage Transplantation
- Fracture and Musculoskeletal Trauma surgery
- Bone density screening with management of Osteoporosis
- Hip resurfacing

Arthroscopic Procedures

- Diagnostic Knee / Shoulder / Ankle / Elbow / Wrist Arthroscopy
- Menisectomy and Repair
- ACL / PCL Reconstruction
- Subacromial Decompression (Shoulder)
- Rotator Cuff Repair
- Shoulder Stabilization

Paediatric Surgeries

- Hip Dysplasia & Dislocation
- Scoliosis & Spinal Deformity Correction
- Limb Lengthening & Stature Gain Surgery
- Limb Deformities & Club Foot Correct
- Cerebral palsy surgery

Spine Surgeries

- Spinal Decompression
- Spinal Fusion
- Spinal Fixation
- Motion Preserving Spine Surgery
- Deformity Correction
- Vertebral Body Reconstruction
- Revision Spine Surgery
- Intradural Pathologies
- Interventions For Pain Management

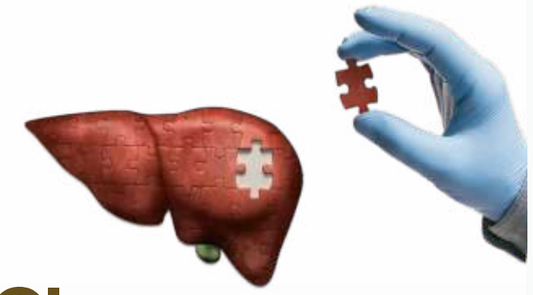

Benefits of Robotic System

- More Accurate Implant Placement
- Reduced Risk of Injury
- Quicker Recovery & Less Pain
- Early Discharge from Hospital

It has the potential for better long-term function and better implant survivorship and longevity!

Artemis Organ Transplant Centre

Department of Liver Transplant & GI Surgery

Liver transplantation is the surgical replacement of a diseased liver with a healthy liver. The indication for this operation is end-stage liver disease, characterized by patients suffering from reduced liver function, muscle loss, fatigue, and encephalopathy, signs of portal hypertension, poor blood clotting and jaundice. A variety of liver diseases can lead to end-stage liver disease.

We Specialize In

- Safe Donor Surgery in Liver Transplant
- Liver Transplant for Liver Cancers
- Portal Vein Reconstruction in Whipple's Operation
- Liver Resection for Cholangiocarcinoma
- Shunt Surgery for Portal Hypertension
- ABO incompatible liver transplants
- Advanced Laparoscopic Surgery
- GI & HPB Cancer Surgery
- Non Cancer GI & HPB Surgery

One of the few Hospitals In India to offer all three methods of Liver Transplantation

- **Advanced Laparoscopic Surgery**
- **Da Vinci Robotic Donor Surgery**
- **Conventional (Open Surgery)**

Cirrhosis is the major cause leading to Liver failures!

Other factors include
- Hepatitis B & C
- Fatty Liver Disease
- Alcoholic Liver Disease
- Genetic Diseases
- Diseases that affect the Bile Duct

Kinds of Liver Transplant

Cadaveric Donor Liver Transplant

After an evaluation is completed, the patient is placed on the liver transplant waiting list in case of cadaveric donor organ transplant. Our centre receives a liver offer from ORBO for a specified patient. The patient is then notified and admitted to the hospital. While the donor team is procuring the donor liver, the recipient team begins to prepare the patient. The diseased liver is removed and the healthy liver is put in its place. The operation usually takes 6-8 hours. After the surgery the patient begins taking medications to prevent the new liver from being rejected by the body. Complete recovery may take several weeks.

We also specialize in Living Donor Liver Transplant

Artemis Organ Transplant Centre

Department of Kidney Transplant & Nephrology

Kidney transplant is a surgical procedure in which a kidney from either a healthy living donor or a deceased donor (cadaver) is implanted in to the renal failure patient. Kidney transplant has many limitations like arranging for a kidney from relatives or close friends. This at times becomes a herculean task. Alternatively, the patients can live on dialysis. It is very important to understand that without dialysis or transplant, the end stage kidney patient cannot survive at all. So although dialysis is expensive, at times painful and time-consuming but it is the only way to live for many years in the face of ESRD.

We Specialize In Both

- **Conventional (Open Surgery)**
- **Da Vinci Robotic Surgery**

Diabetes, High Blood Pressure, Stones and certain medications can damage kidneys.

Symptoms of Kidney Failures

- Weight loss and poor appetite
- Swollen ankles, feet or hands
- Shortness of breath
- Feeling sick
- Tiredness
- Headaches
- Blood in your urine
- Erectile dysfunction in men
- An increased urge to pee especially at night
- Insomnialtchy skin
- Muscle cramps

Nephrology

A preeminent centre for the management of all renal problems. We take pride in our cutting edge facilities for renal pathology with complete biochemical, immunological, microbiological and histological back up all under one roof. Our range of services include Clinical Nephrology,Dialysis Unit & Chronic Peritoneal Dialysis/Automated Peritoneal Dialysis.

Our Services

- Hemodialysis
- Peritoneal Dialysis
- Continuous Renal Replacement Therapy (CRRT)
- CAPD Catheterization
- Vascular Access for Hemodialysis
- Plasmapheresis
- Focus on preventive aspects of HD and slowing disease progression to dialysis by managing patients under dietary modification and medicines
- Hemoperfusion
- Kidney Biopsy and other procedures

Artemis Organ Transplant Centre

Department of Cornea Transplant

A corneal transplant involves replacement of a damaged cornea with a healthy one from a donor. An unhealthy cornea affects the vision by either not allowing light to enter the eye or causing significant scattering or distortion of light. This causes blurry vision. A cornea transplant is required to restore functional vision.

Sometimes diseases of the cornea including infections can cause significant weakening of the cornea. In these cases corneal transplants are performed in order to protect the integrity of the eye, relieve pain and remove the diseased cornea.

Who All Can Benefit from Corneal Transplantation?

Corneal transplantation may be required in various eye diseases which can include the following:

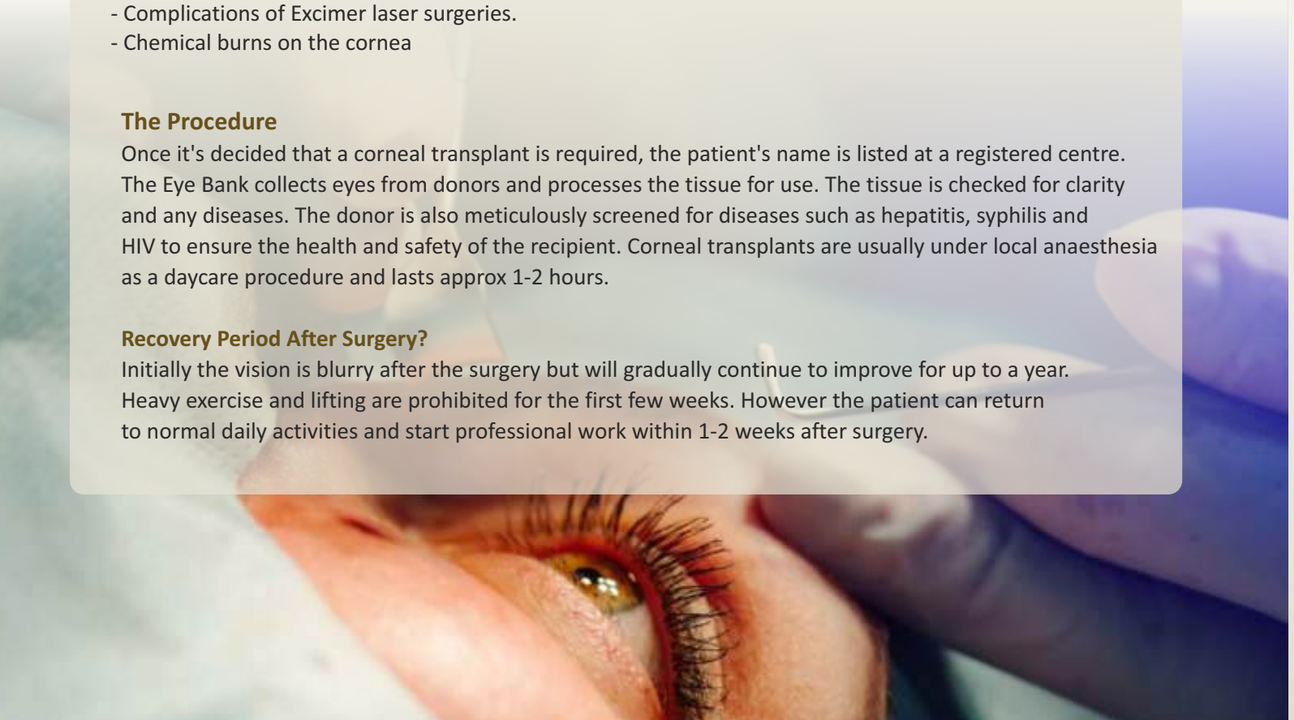

- Opacities in cornea due to previous infections such as corneal ulcer, herpes of the eye or eye injury.
- Keratoconus and other similar diseases which result in thinning and irregular shape of the cornea.
- Hereditary diseases of the cornea.
- Corneal failure (Bullous Keratopathy) from previous surgeries or injuries causing edema
- Complications of Excimer laser surgeries.
- Chemical burns on the cornea

The Procedure

Once it's decided that a corneal transplant is required, the patient's name is listed at a registered centre. The Eye Bank collects eyes from donors and processes the tissue for use. The tissue is checked for clarity and any diseases. The donor is also meticulously screened for diseases such as hepatitis, syphilis and HIV to ensure the health and safety of the recipient. Corneal transplants are usually under local anaesthesia as a daycare procedure and lasts approx 1-2 hours.

Recovery Period After Surgery?

Initially the vision is blurry after the surgery but will gradually continue to improve for up to a year. Heavy exercise and lifting are prohibited for the first few weeks. However the patient can return to normal daily activities and start professional work within 1-2 weeks after surgery.

Artemis Organ Transplant Centre

Department of Bone Marrow Transplant

Bone marrow transplant (BMT) is the procedure that is used to replace the unhealthy bone marrow with new and healthy bone marrow. Bone marrow is the soft, fatty tissue inside the bones that is responsible for the production of blood cells. There are several medical conditions due to which the bone marrow become dysfunctional and therefore needs to be replaced. Further there are multiple types of Bone Marrow Transplants based on the donor of the bone marrow or stem cells.

Bone Marrow Transplant can cure Blood Cancers & Blood Disorders like

- Thalassaemia
- Aplastic Anaemia
- Leukaemia (Blood Cancer)
- Lymphoma
- Immunodeficiencies

We Specialize in

Allogenic Bone Marrow Transplant : It involves using the patient's own bone marrow and is recommended to treat certain medical conditions where the bone marrow is dysfunctional.

- Cancers like Leukaemia, Myelo-dysplasia etc
- Diseases that affect the production of bone marrow cells like Aplastic Anaemia | Other Marrow Failure States | Sever Immunodeficiency Syndrome's | Sickle Cell Anaemia | Thalassemia major

Autologous Bone Marrow Transplant : It involves receiving bone marrow from a donor and isrecommended to treat where we need to give high dose of chemotherapy to treat underlying disease following which autologous harvested bone marrow is given as rescue. The indications include Cancers Like: *Neuroblastoma | Medulloblastoma, Wilm's Tumor | Lymphoma's | Multiple Myeloma Etc. It can also be used to treat various autoimmune diseases, the commonest indication being Multiple Scelerosis.*

Umbilical Cord Blood Transplant : CBT may be a treatment option for patients who lack a MS and a MUD. Cord blood transplantation has shown promise in treatment of Formidable Diseases & Neurodegenerative Diseases like Parkinson's Disease, Alzheimer's Disease, Multiple Sclerosis (MS) & ALS.

Our Credentials

250+ Successful Stem Cell Transplants

Both Adult & Paediatric Stem Cell Transplants

14 Beds Dedicated to BMT Unit

NMDP USA

Artemis is the First hospital in North India to be accredited with National Marrow Donor Program

We Take Pride in

- Being a Centre of Excellence for BMT in Multiple Sclerosis and other Autoimmune diseases like Systemic Sclerosis, Dermatomyositis, Myasthenis gravis etc.
- Performing all kinds of BMTs like MSD, MUD & Haplo for both Pediatric and Adult patients.
- Successfully salvaging many complicated transplants with other commodities like Dialysis dependent kidney failure, Graft failure and multi-organ failure.

ARTEMIS MINIMALLY INVASIVE AND BARIATRIC CENTRE

Weight Loss Procedures

- Laproscopic Adjustable Gastric Band (AGB)
- Laparoscopic Roux En Y Gastric Bypass
- Endoscopic Sleeve Gastroplasty
- Gastric Sleeve Surgery
- Laparoscopic Mini Gastric Bypass
- Intra Gastric Balloon
- Allurion Gastric Balloon
- Robotic Assisted Laparoscopic Procedures
  (Robotic Sleeve Gastrectomy & Gastric Bypass)

Robotic Assisted Surgical System
Laparoscopic Procedures for Obesity

da Vinci® Robotic Surgical System

At Artemis, our Minimally Invasive and Bariatric Centre is focussed on addressing obesity with modern treatment strategies. Our Bariatric surgeons perform the safest and most effective weightloss surgery procedures. Our centre is focussed on providing effective ways of treating obesity using the most advanced medical technology available anywhere in the world. Our specialized team of bariatric surgeons offer the best treatment to the patients so that they lose weight and lead a healthy life afterwards.

Our Surgical & Non Surgical Procedures

All our procedures lead to significant weight loss and allows quick return to daily activities.

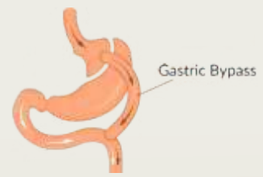

Laproscopic Adjustable Gastric Band (AGB)

An inflatable band that is placed around the upper portion of the stomach and therefore, making stomach smaller. The surgery limits the amount of food the stomach can hold and therefore weightloss.

Laparoscopic Roux-en-Y Gastric Bypass

The surgeon reduces the size of your stomach to a small pouch by stapling off a section of it and then attaching it directly to the small intestine, bypassing most of the rest of the stomach and the upper part of the small intestine.

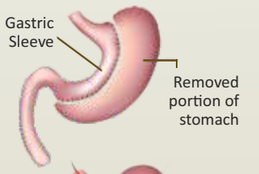

Endoscopic Sleeve Gastroplasty

A suturing device is inserted into your throat and down to your stomach. The endoscopist then places sutures in your stomach to make it smaller.

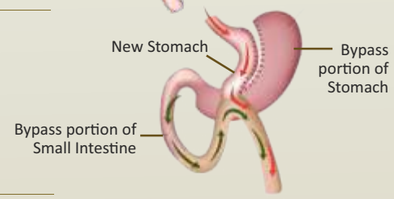

Gastric Sleeve Surgery

In this Bariatric surgery procedure a large portion of your stomach is removed, leaving behind a narrow 'sleeve.' Reducing your stomach helps in reducing hunger signals and thereby less intake of calories.

Laparoscopic Mini Gastric Bypass

Mini gastric bypass closes off a large part of the stomach it is able to limit the volume of food that the stomach can hold and decrease food intake. Consequently, a longer feeling of fullness can be felt.

Intra Gastric Balloon

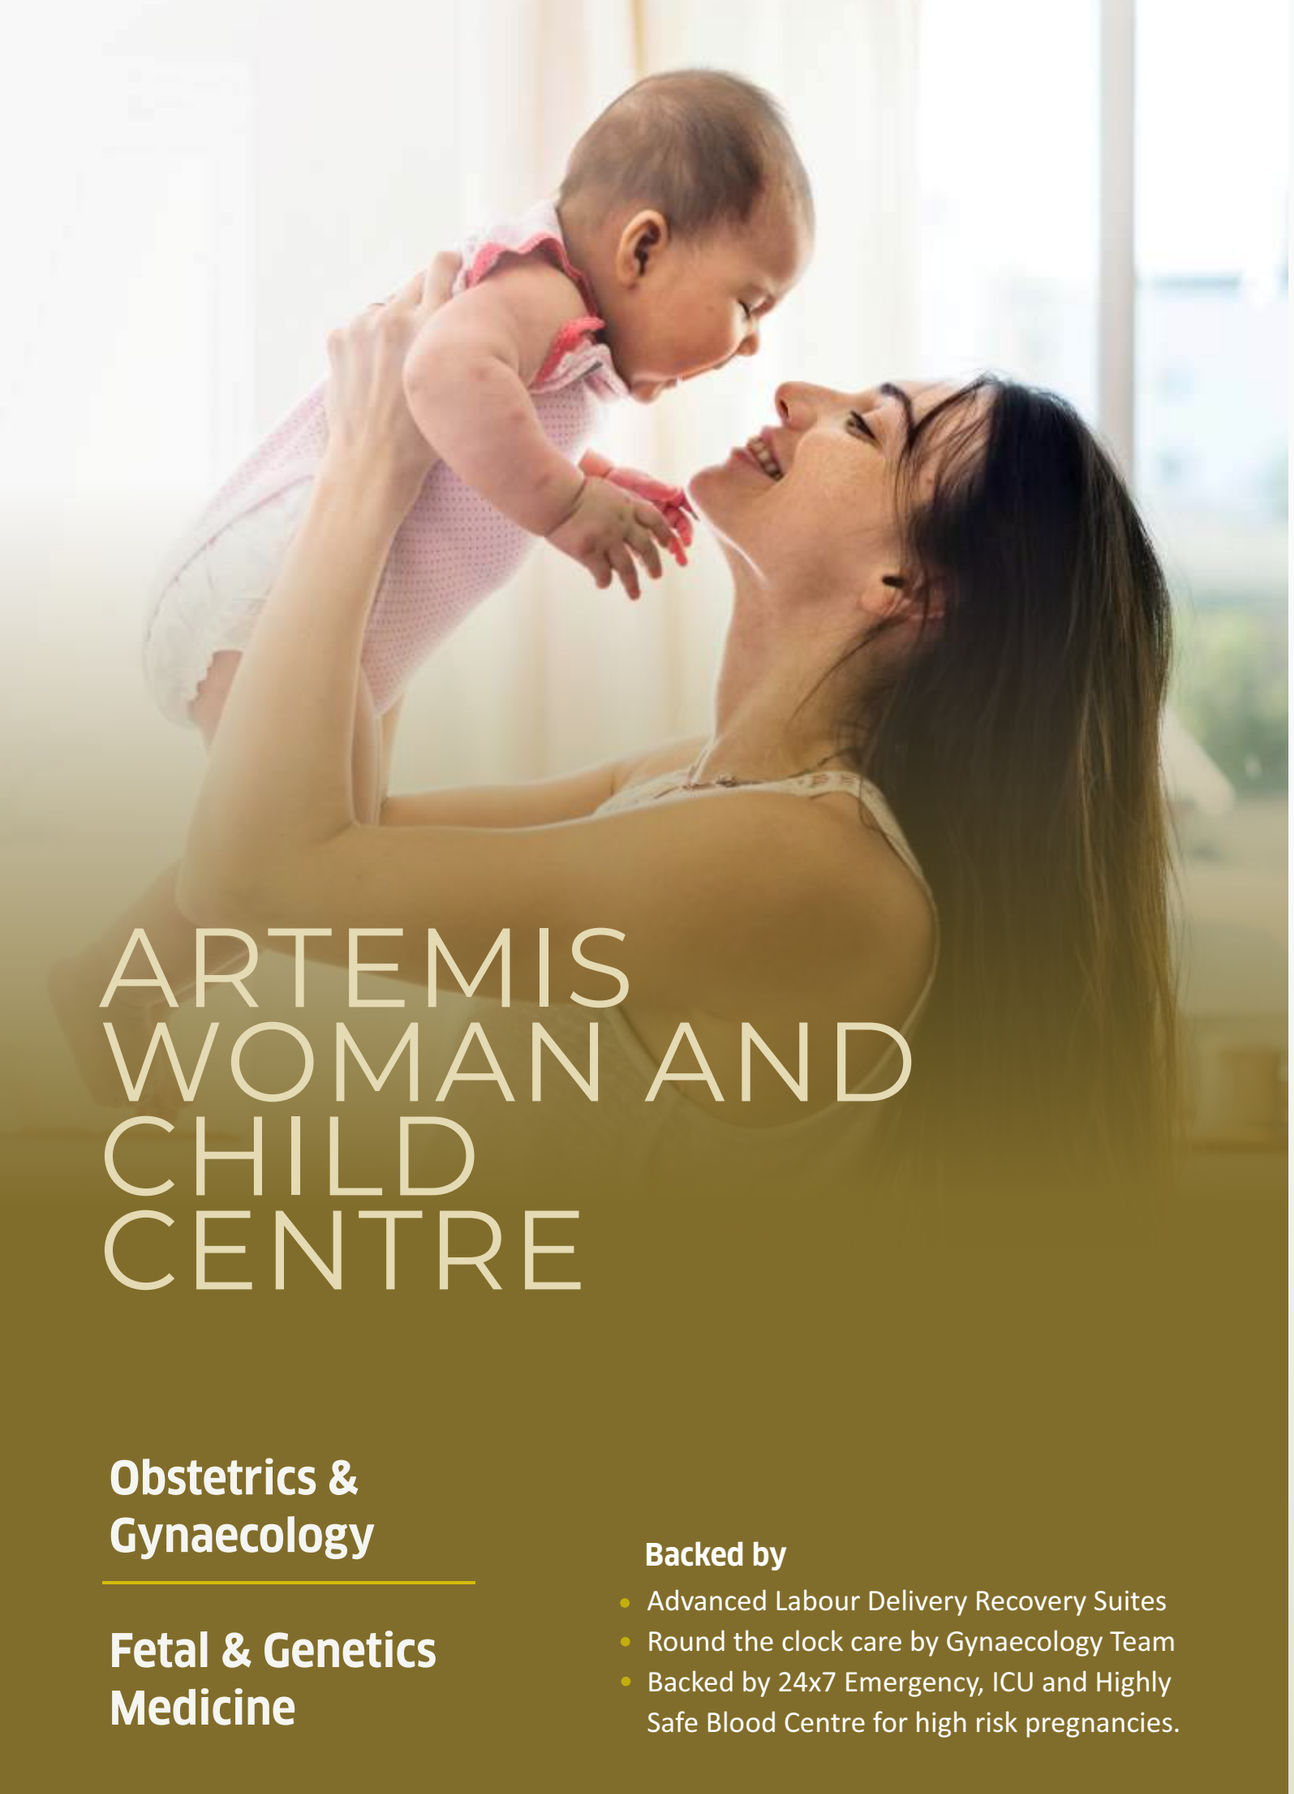

The IGB procedure uses a balloon that is placed down your throat into your stomach through endoscopy or simply by swallowing. The balloon is filled with saline that causes you to feel full quicker and be less hungry.

Allurion Gastric Balloon

A capsule that contains the Allurion Balloon is swallowed during a 20 minutes walk-in placement. It's then inflated with liquid. With the balloon in your stomach, you end up eating less without feeling hungry.

ARTEMIS WOMAN AND CHILD CENTRE

Obstetrics & Gynaecology

Fetal & Genetics Medicine

Backed by

- Advanced Labour Delivery Recovery Suites
- Round the clock care by Gynaecology Team
- Backed by 24x7 Emergency, ICU and Highly Safe Blood Centre for high risk pregnancies.

At Artemis Women & Child Centre we offer the highest quality of care and most advanced treatments for every mother, every baby and woman of every age. Every day, we are dedicated to improving and advancing the wellbeing of our patients. For women, we offer obstetric services, including high-risk maternal-fetal medicine, in addition to a full range of gynecologic services.

For our young patients, we provide consultation and care in more than 10 specialties including adolescent medicine, allergy and immunology, cardiology, critical care, endocrinology, hematology/oncology, infectious disease, neonatal-perinatal medicine, neurology, pulmonary medicine and surgery to name some.

We take pride in our Level IV nursery care for complex and critically ill newborns.

Our Services

Gynaecology

- Specialized medical and surgical management of gynecological problems.
- Laparoscopic and Hysteroscopic Surgeries for treating various gynaecological diseases like ovarian cysts, endometriosis, chronic pelvic pain, ectopic pregnancy, febroids and other diseases.
- Gynaecological Oncology - Comprehensive treatment for genital cancers of the uterus, cervix, vagina, vulva and ovaries.

Fetal Medicine

- Expertise in Fetal Interventions and Clinical Genetics.
- Providing a world class and comprehensive care for the fetus in mother's womb and mother's experiencing complex congenital abnormality or complicated pregnancy.

Genetic Medicine

- Clinical genetics.
- Prenatal genetic evaluation.
- Accurate fetal diagnosis of an evolving condition.
- Treatment services throughout pregnancy.

Birthing (Obstetrics)

- Prenatal Counseling
- Professional counseling & care throughout pregnancy, childbirth and early parenthood
- Deliveries of normal & high risk pregnancies in the hands of experts
- Obstetrical care - Ante-natal & postnatal classes, dietary counseling, fetal monitoring, stem cell banking
- Prenatal diagnosis & Ultra Sonography with 3D/4D ultrasound
- Lactational Advice Services
- Six LDR (labor, delivery and recovery) rooms and neonatal Intensive Care Unit to take exclusive care for mother and newborn.
- Painless deliveries (Epidural analgesia)
- Newborn care by expert pediatricians.

We take pride in our Luxury Woman & Child Hospital Brand now open in multiple locations!

Daffodils BY ARTEMIS HOSPITALS

PAEDIATRICS & PAEDIATRIC SUPER SPECIALTIES

ARTEMIS WOMAN AND CHILD CENTRE

Backed by

- Tertiary level NICU & PICU
- Advanced Labour Delivery Recovery Suites
- Round the clock care by Neonatology Team
- Fully equipped to handle any Neonatal Emergency
- Equipped with Mechanical Ventilators
- High-end Multifunctional Monitors
- Double Surface Phototherapy
- Emergency, ICU and Highly Safe Blood Centre backup

The department of Paediatrics & Allied Services in Artemis recognizes the value of every child and family. We are guided by our commitment to excellence and high standards of care, providing health care to all from neonatal period to adolescence.

Our Services

General Paediatrics

Having a child in the hospital can be one of the most difficult and upsetting periods for any parent. You are bound to be anxious and may not know what to expect. Our aim is to provide holistic care to the children in an environment which is sensitive to the needs of the child and the family. Our experts of various paediatric specialities function as a team to make sure that the child and the family get the care and support that they duly deserve.

- **Level III Neonatal ICU**
- **Very low birth-weight babies management**
- **Premature babies**
- **Critical Care for newborns**
- **Complete Paediatric Management**
- **Vaccinations**
- **Kangaroo Mother Care**
- **Wheezy Child Management**
- **Asthma Management**

Our Paediatric Super Specialities

Paediatric & Neonatal Emergencies
Backed by round the clock NICU | PICU | HDU

Paediatric Cardiology & Cardiovascular Surgery
We offer minimally invasive as well as Open heart surgeries to treat heart diseases.

Paediatric Neurology & Neurosurgery
We treat with conditions like - Genetic diseases of the nervous system, Childhood Epilepsy, Cerebral Palsy, Speech Disabilities, Brain tumors, Autism spectrum disorders, to name some.

Paediatric Oncology
We cater to children, adolescents and young adults with cancer, blood disorders, bone marrow failure and congenital immune deficiencies.

Paediatric Surgery
The hospital has a dedicated Paediatric Surgery Program for a wide range of congenital and acquired conditions requiring surgical intervention.

Paediatric Transplants
We specialize in Liver, Kidney, Bone Marrow and Cornea Transplants in infants, children and adolescents.

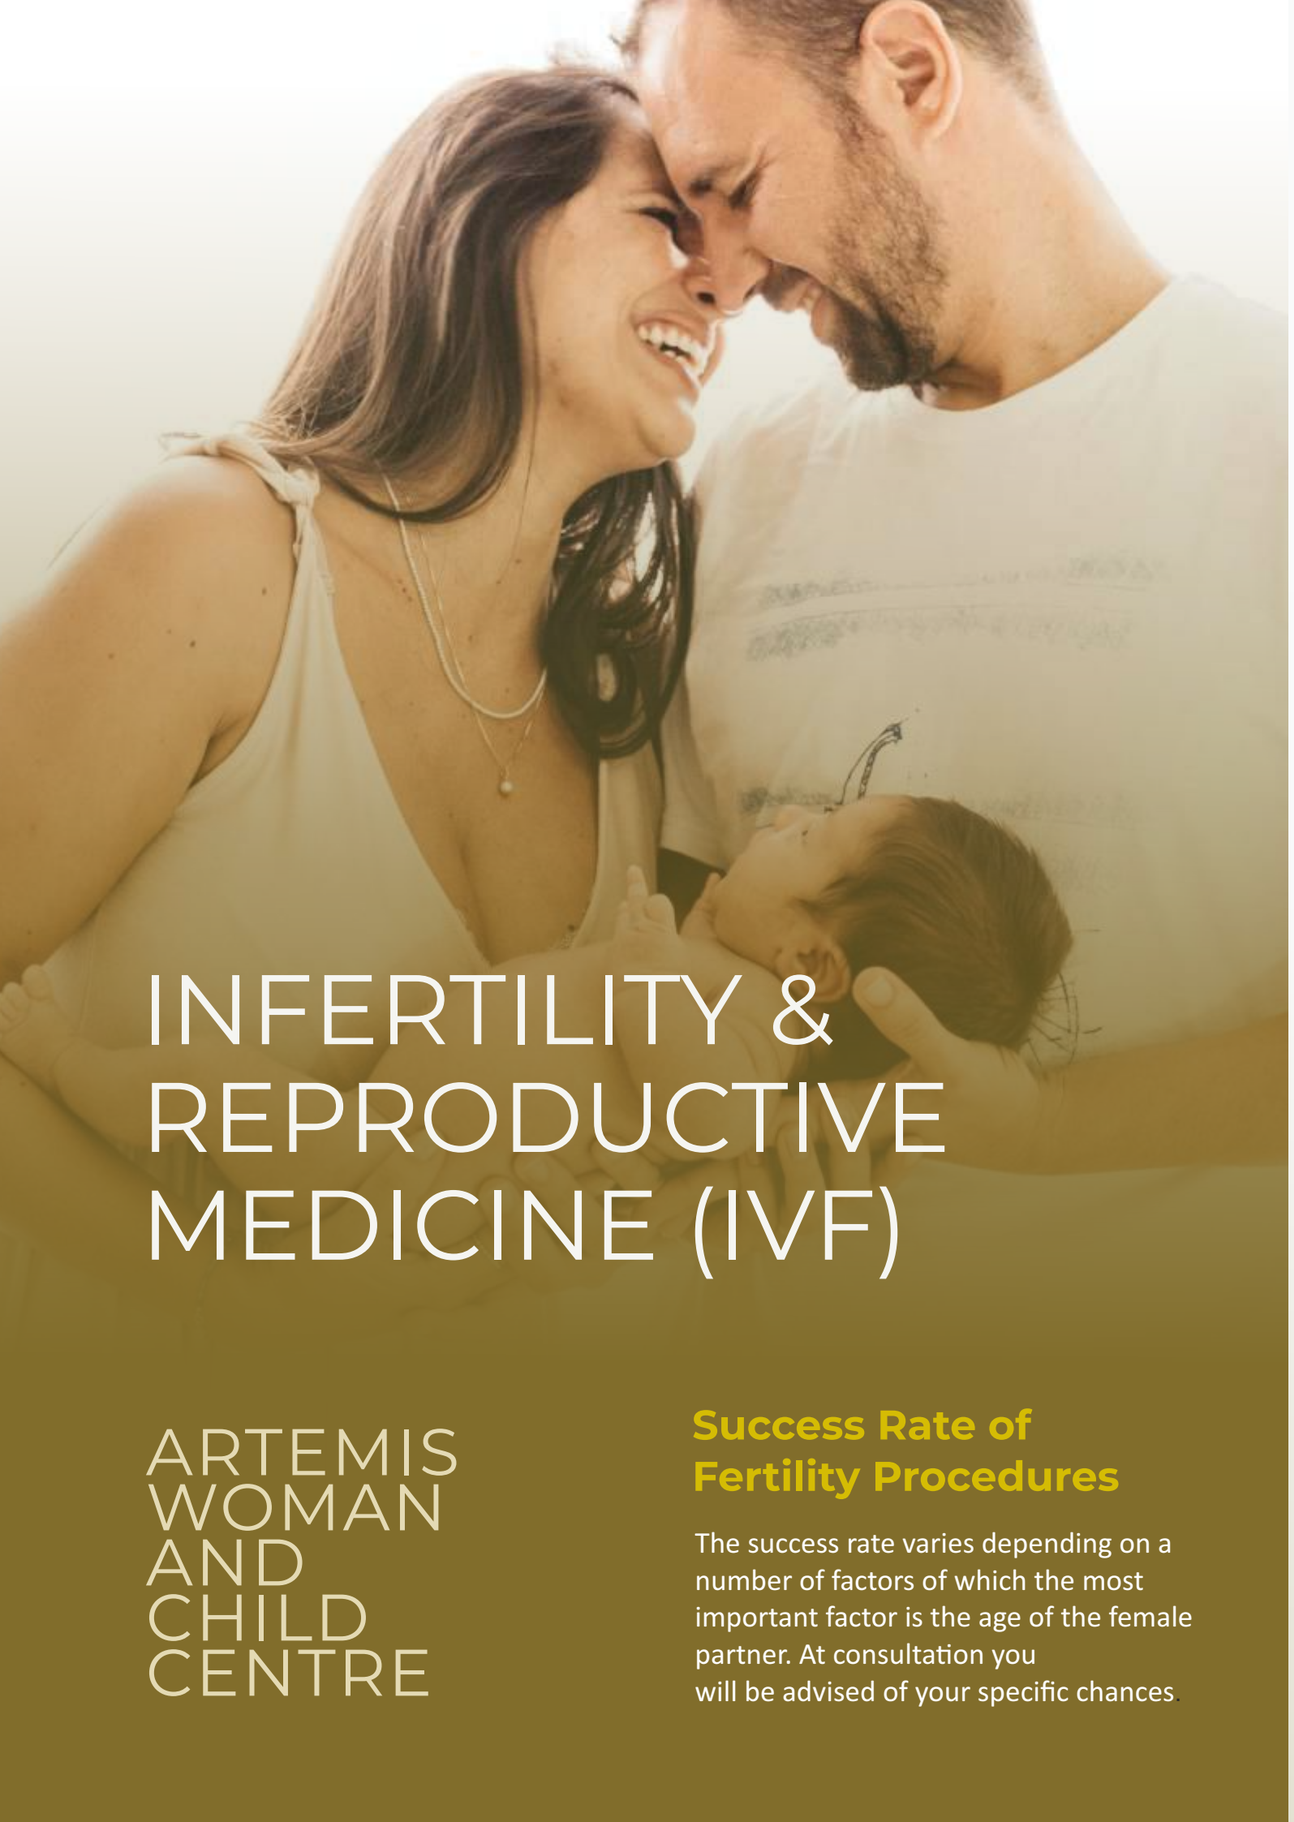

Paediatric Gastroenterology
We have the expertise in treating children with Digestive, liver, and nutritional problems.

Paediatric Endocrinology
We have expertise in the management of childhood Diabetes, disorders of Thyroid, Adrenal Gland and monitoring of growth and puberty.

Paediatric Nephrology
We diagnose, treat, and manage disorders affecting the kidney and urinary tract, including kidney failure, inherited kidney diseases, kidney stones, urinary tract infections and conditions requiring surgical intervention.

Special Children Centre (ASCC)
The focus of the department is trans-disciplinary approach which enables the patients to avail paediatric rehabilitation under one roof.

These disciplines are
- Physiotherapy & Occupational Therapy
- Speech Therapy
- Clinical Psychology
- Orthotics

INFERTILITY & REPRODUCTIVE MEDICINE (IVF)

ARTEMIS WOMAN AND CHILD CENTRE

Success Rate of Fertility Procedures

The success rate varies depending on a number of factors of which the most important factor is the age of the female partner. At consultation you will be advised of your specific chances.

There have been phenomenal changes in the field of reproductive medicine in past decade. New techniques and their execution based on better understanding of reproduction have made it possible to fulfil the dream of motherhood for many.

However, infertility treatment is not facile and we keep abreast with all the latest developments taking place within the ecosystem of reproductive medicine in order to offer the best to hopeful mothers. We are committed to provide the most advanced treatments available worldwide.

A comprehensive fertility program: As patients deal with the impending pressure of linked with IVF, we help them through series of counselling and psychological support as a part of our fertility program. The IVF department at Artemis is sensitive to the many difficult decisions couples face while undergoing infertility evaluation and treatment. Therefore, providing accurate information to patients through patient education is of utmost importance to us.

Our Services

- Endoscopic Procedures
- Diagnostic & Operative Laparoscopy
- Diagnostic & Operative Hysteroscopy
- Hysteroscopic Tubal Recanalisation, Sonography
- Sonography
- Dimensional Ultrasonography
- Diagnostic & Interventional Sonography
- Embryo Reduction
- Sono Salpingography Andrology
- Andrology
- Computer Assisted Semen Analysis & Sperm Morphology
- Sperm Fragmentation Test
- Sperm preparation for Normospermic & Male Infertility
- ART
- IUI (AIH & AID)
- In-Vitro fertilization, ICSI, TESA, IMSI
- Laser assisted ICSI
- Blastocyst Transfer
- Laser Assisted Hatching
- Pre implantation genetic diagnosis
- Cryopreservation
- Sperm & Embryo
- Oocyte & ovarian tissue

Specialized Services

- **Andrology Service**
  - IMSI
  - Sperm DNA Fragmentation Test
- **Assisted Hatching Before Implantation**
- **Blastocyst Transfers Embrayo**
  - In Vitro Egg maturation
  - Pre implantation genetic diagnosis Procedure
- **Gamete Donation & Embryo Donation**
  - Donor Insemination (DI)
  - Egg Donation
  - Embryo Donation
  - Surrogacy (renting a womb)
- **Cryopreservation (Freezing and Storage)**
  - Cryopreservation of Embryo
  - Frozen Embryo Replacement (FER)
  - Cryopreservation of Sperm

We think of each couple as members of our team working towards a common goal – **your successful pregnancy!**

ARTEMIS PULMONOLOGY AND CRITICAL CARE CENTRE

The Centre is well staffed with a team of highly qualified and experienced pulmonologists and Intensivists

Equipped with

- Endobronchial ultrasound system (EBUS)
- Video Bronchoscopy Suite
- Comprehensive Sleep Lab (PSG)
- Integrated Intensive Care
- Pulmonology Rehabilitation
- PFT, DLCO

The department of Pulmonology deals with the diseases affecting the lungs and the respiratory system. Department has the facility for the evaluation & management of the entire range of acute & chronic respiratory diseases such as Asthma and respiratory allergies, COPD, ILD, Lung cancer, Auto immune disorders, sleep related disorders and chest wall disorders.

The Department is integrated with the Critical Care unit in order to provide comprehensive care to patients requiring life support. A highly qualified team of intensive care specialists is available 24X7. Procedures like ECMO & CRRT are undertaken. Apart from the expertise the department is well equipped with the latest diagnostic & therapeutic technolologies in the field of respiratory care.

We have the capability for the evaluation & management of the entire range of acute & chronic respiratory diseases

Respiratory High Dependency Unit (RHDU)
The department has its own high dependency unit (HDU), which provides closer observation and monitoring.

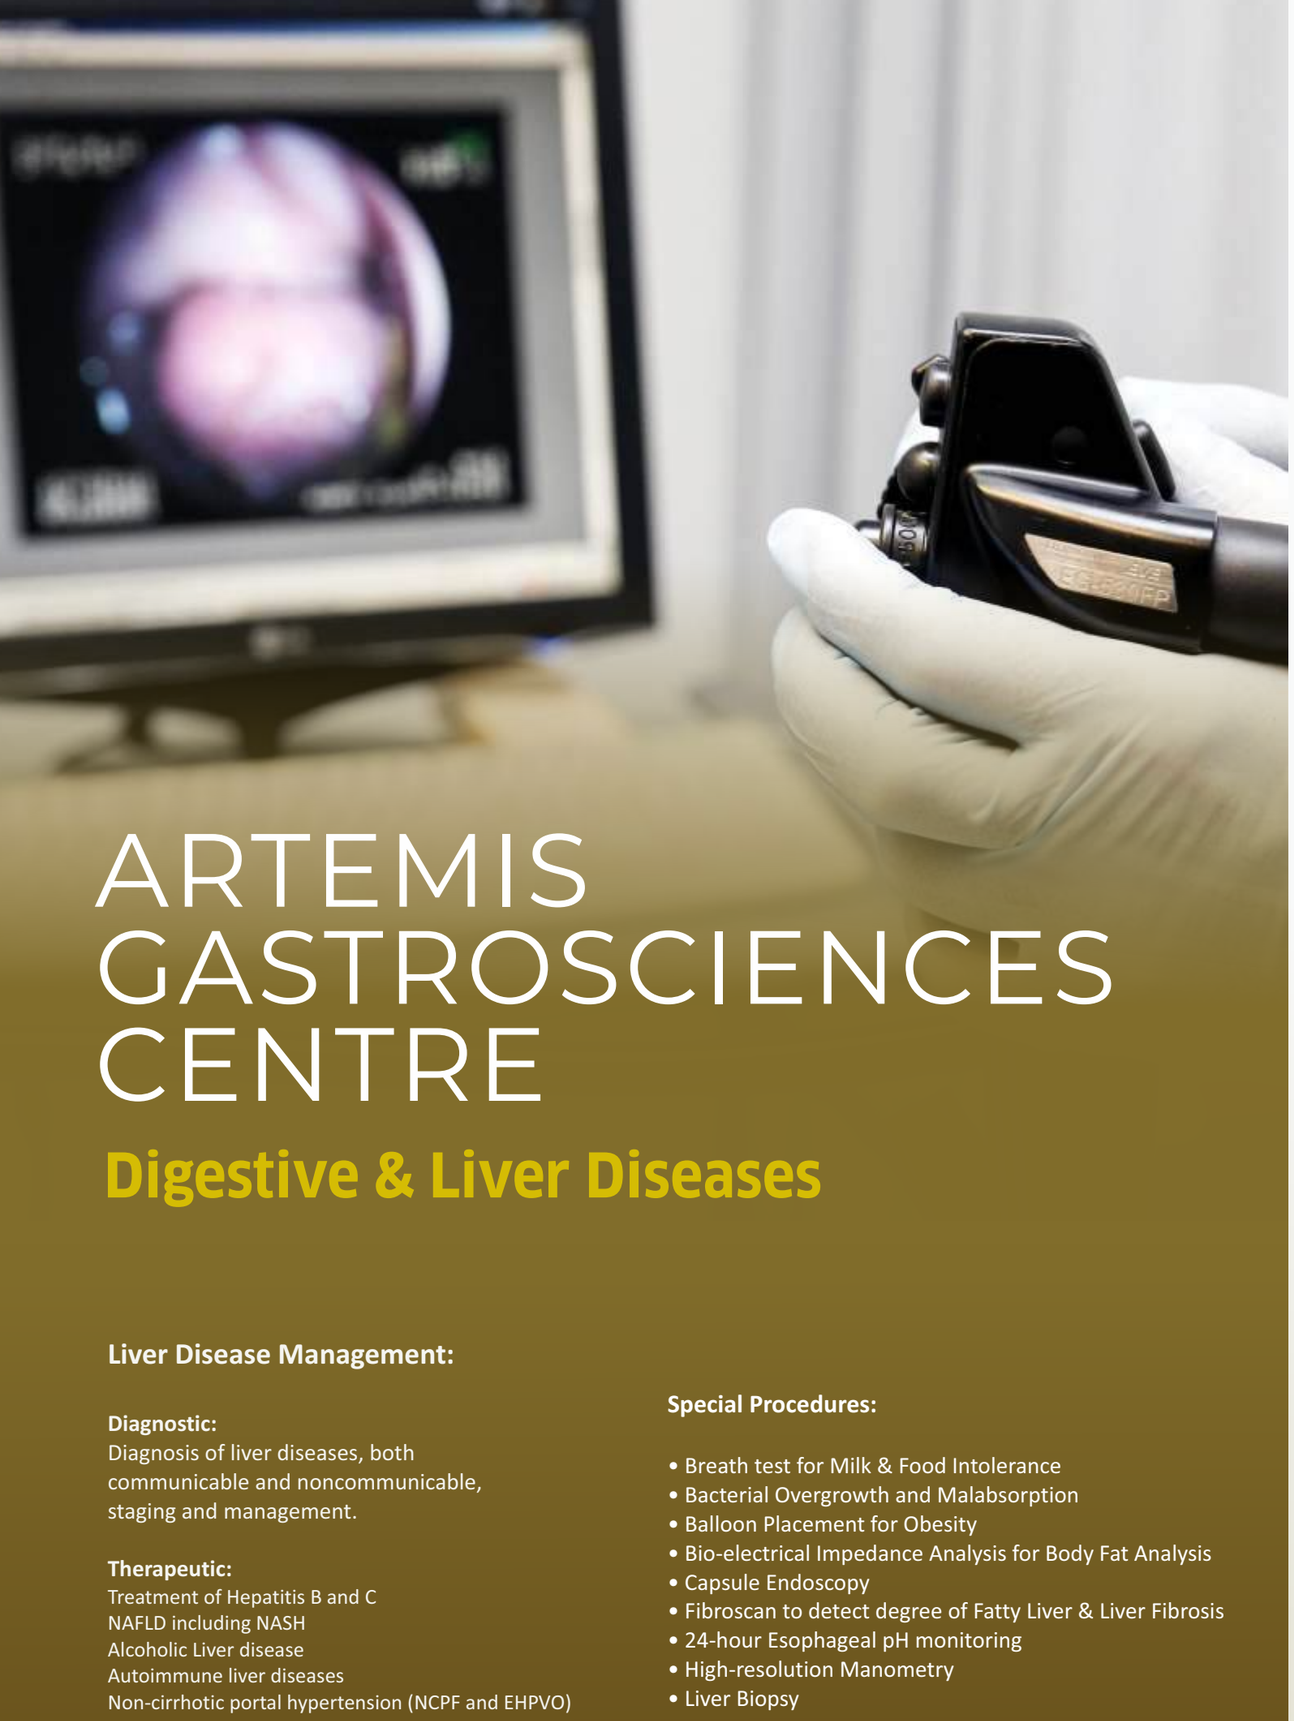

Pulmonary Function Laboratory
PFT lab is equipped with advanced Morgans spiroair with the provision of doing lung diffusion and volume studies besides routine spirometry. Preoperative analyses for patients undergoing thoracic & extrathoracic surgical intervention are performed on a regular basis. The facility of bedside spirometry is also available for patients who can't be moved to the lab.

Video Assisted Bronchoscopy
Bronchoscopy is a technique of visualizing the inside of the airways for diagnostic and therapeutic purposes.

Sleep Service
Sleep studies are being done regularly for patients with obstructive sleep apnea, obesity hypoventilation syndrome, disorders of excessive snoring, and daytime sleepiness. The centre is equipped with a state-of-the-art sleep lab and facilities for diagnostic and titration studies are a regular feature!

Pulmonary Rehabilitation
The rehabilitation program offers graduated muscle exercises and training for those who suffer from confining respiratory ailments like advanced COPD & chronic respiratory failure. ARDS in ECMO, Respiratory dialysis (Hemolung) systems in respiratory distress are already in use at our centre. All types of lung and thoracic surgeries are performed by an experienced team of thoracic surgeons at our institute.

Specialty Clinic
- Asthma Clinic
- Sleep Disorder Clinic
- Smoking Cessation Clinic
- Respiratory Clinic

ARTEMIS GASTROSCIENCES CENTRE

Digestive & Liver Diseases

Liver Disease Management:

Diagnostic:
Diagnosis of liver diseases, both communicable and noncommunicable, staging and management.

Therapeutic:
Treatment of Hepatitis B and C
NAFLD including NASH
Alcoholic Liver disease
Autoimmune liver diseases
Non-cirrhotic portal hypertension (NCPF and EHPVO)

Special Procedures:

- Breath test for Milk & Food Intolerance
- Bacterial Overgrowth and Malabsorption
- Balloon Placement for Obesity
- Bio-electrical Impedance Analysis for Body Fat Analysis
- Capsule Endoscopy
- Fibroscan to detect degree of Fatty Liver & Liver Fibrosis
- 24-hour Esophageal pH monitoring
- High-resolution Manometry
- Liver Biopsy

Artemis Gastrosciences Centre possesses modern state-of-the-art equipment backed by advanced intensive care units. Our Gastroenterology specialists provide comprehensive services in both Medical and Surgical Gastroenterology and are equipped with a high-tech facility to provide excellent diagnostics of diseases of the Liver, Pancreato-Biliary, and Gastrointestinal disorders in children and adults.

The Centre provides world-class treatment and painless endoscopic procedures for complex gastrointestinal and Hepatobiliary diseases including cancers.The Esophagus, stomach, small and large intestines, liver, biliary system, and pancreas are all treated at the Centre.

Our Services

Special Focus on Treatment of

- Acidity
- Constipation/ Incomplete evacuation
- Bleeding in Stool
- Cirrhosis of the Liver
- Diarrhoea
- Fatty Liver & Hepatitis
- Gas Problem
- GERD
- Jaundice
- Gallbladder & Pancreas Problems including stones
- Obesity Treatment
- All kinds of Gastric, Intestinal, Liver, Pancreatic & Biliary Cancers

Complete Spectrum of Diagnostic & Therapeutic Endoscopic Services

Endoscopy Services:
- Esophagogastroduodenoscopy
- Sigmoidoscopy
- Full length Colonoscopy
- Ileoscopy
- Enteroscopy: Anterograde and Retrograde
- Endoscopic Ultrasound (EUS)
- FNA (Fine Needle Aspiration)
- Mucosal Enhancing Techniques

Therapeutic Services:
- Upper GI and Lower GI Therapeutic Endoscopy
- Variceal ligation & Endoscopic sclerotherapy
- Glue injection of Gastric Varices
- Esophageal & Intestinal stricture Dilatation
- Achalasia dilatation
- Argon plasma coagulation of mucosal lesions
- Polypectomy for UGI and Colonic polyps
- Endoscopic submucosal dissection (ESD) for mucosal GI lesions
- Foreign body removal from UGI tract
- Endoscopic placement of feeding tubes and PEG / PEJ tubes
- Polypectomies
- Endoscopic sclerotherapy for bleeding colonic & ileal lesions,
- Colonoscopic & Enteroscopic placement of self-expanding metal stents for malignant colonic strictures.

Small Bowel Diseases
Therapeutic Endobiliary & Pancreatic ERCP
Cholangioscopy
Pancreatic ERCP
Endoscopic Mucosal Dissection
Therapeutic Endoscopic Ultrasound (EUS)

Therapeutic Endoscopic Ultrasound (EUS)

- Cystogastrostomy for pseudocyst, WOPN
- Cystoduodenostomy for pseudocyst, WOPN
- Hepatogastrostomy (stomach to bile duct)
- Cholecystoduodenostomy (Gall bladder to the stomach)
- Choledochoduodenostomy (Gall bladder to Duodenum)
- EUS Pancreatico gastrostomy
- EUS Guided Gall bladder drainage
- EUS guided Coil & glue Placement
- EUS Guided RFA of the Bile duct cancer or Pancreatic lesions
- EUS Guided Pelvic abscess drainage
- Biliary Drainage for failed ERCPs Enteroscopic drainage

ARTEMIS DERMATOLOGY, COSMETOLOGY & PLASTIC SURGERY CENTRE

Dermatology & Cosmetology

Plastic, Reconstructive & Cosmetic surgery

Our experienced team of Dermatologists & Plastic Surgeons offer personalized care and advanced treatments to help you look and feel your best.

Dermatology & Cosmetology deals with the entire spectrum of potential skin problems such as breakouts, irregular pigmentation and rosacea, to issues on the body including skin cancer checks, psoriasis and eczema whether mild or severe. A Dermatologist is the most expert doctor to deal with all skin issues. We're here for you, whatever your concern.

Plastic, Reconstructive and Cosmetic surgery on the other hand is performed to correct or improve the function of a part of the body that has been affected by injury, disease, or congenital defects. The goal of reconstructive plastic surgery is to restore the normal appearance and function of the affected area to the greatest extent possible.

Services : Dermatology & Cosmetology

- Laser Hair Reduction

- Pixel Perfect Laser Therapy
Acne scars | Stretch Marks | Trauma Scars

- Clear Skin
Gentle Medical Peels | Skin Polishing | Dark Circle Treatment

- Skin Polishing & Medical Peels
- Dark Spots
- Chemical Peels
- Medical Microdermabrasion

- Collagen Enhancement Laser Therapy
Skin Tightening | Non invasive Face & Neck Lift

- Crystal Clear Skin
Skin tags | Freckles | Warts | Moles

- Anti-Aging
Photo Damaged Skin | Hyper Pigmentation | Melasma | Laser Photo facials

- Botox & Fillers
- Perlane
- Tattoo & Mole Removal

- Narrowband Ultraviolet B Therapy
Revolution in the treatment of Vitiligo & Psoriasis

- Nail Surgeries for ingrowing toe nail & Onychomycosis

Services : Plastic, Reconstructive & Cosmetic Surgery

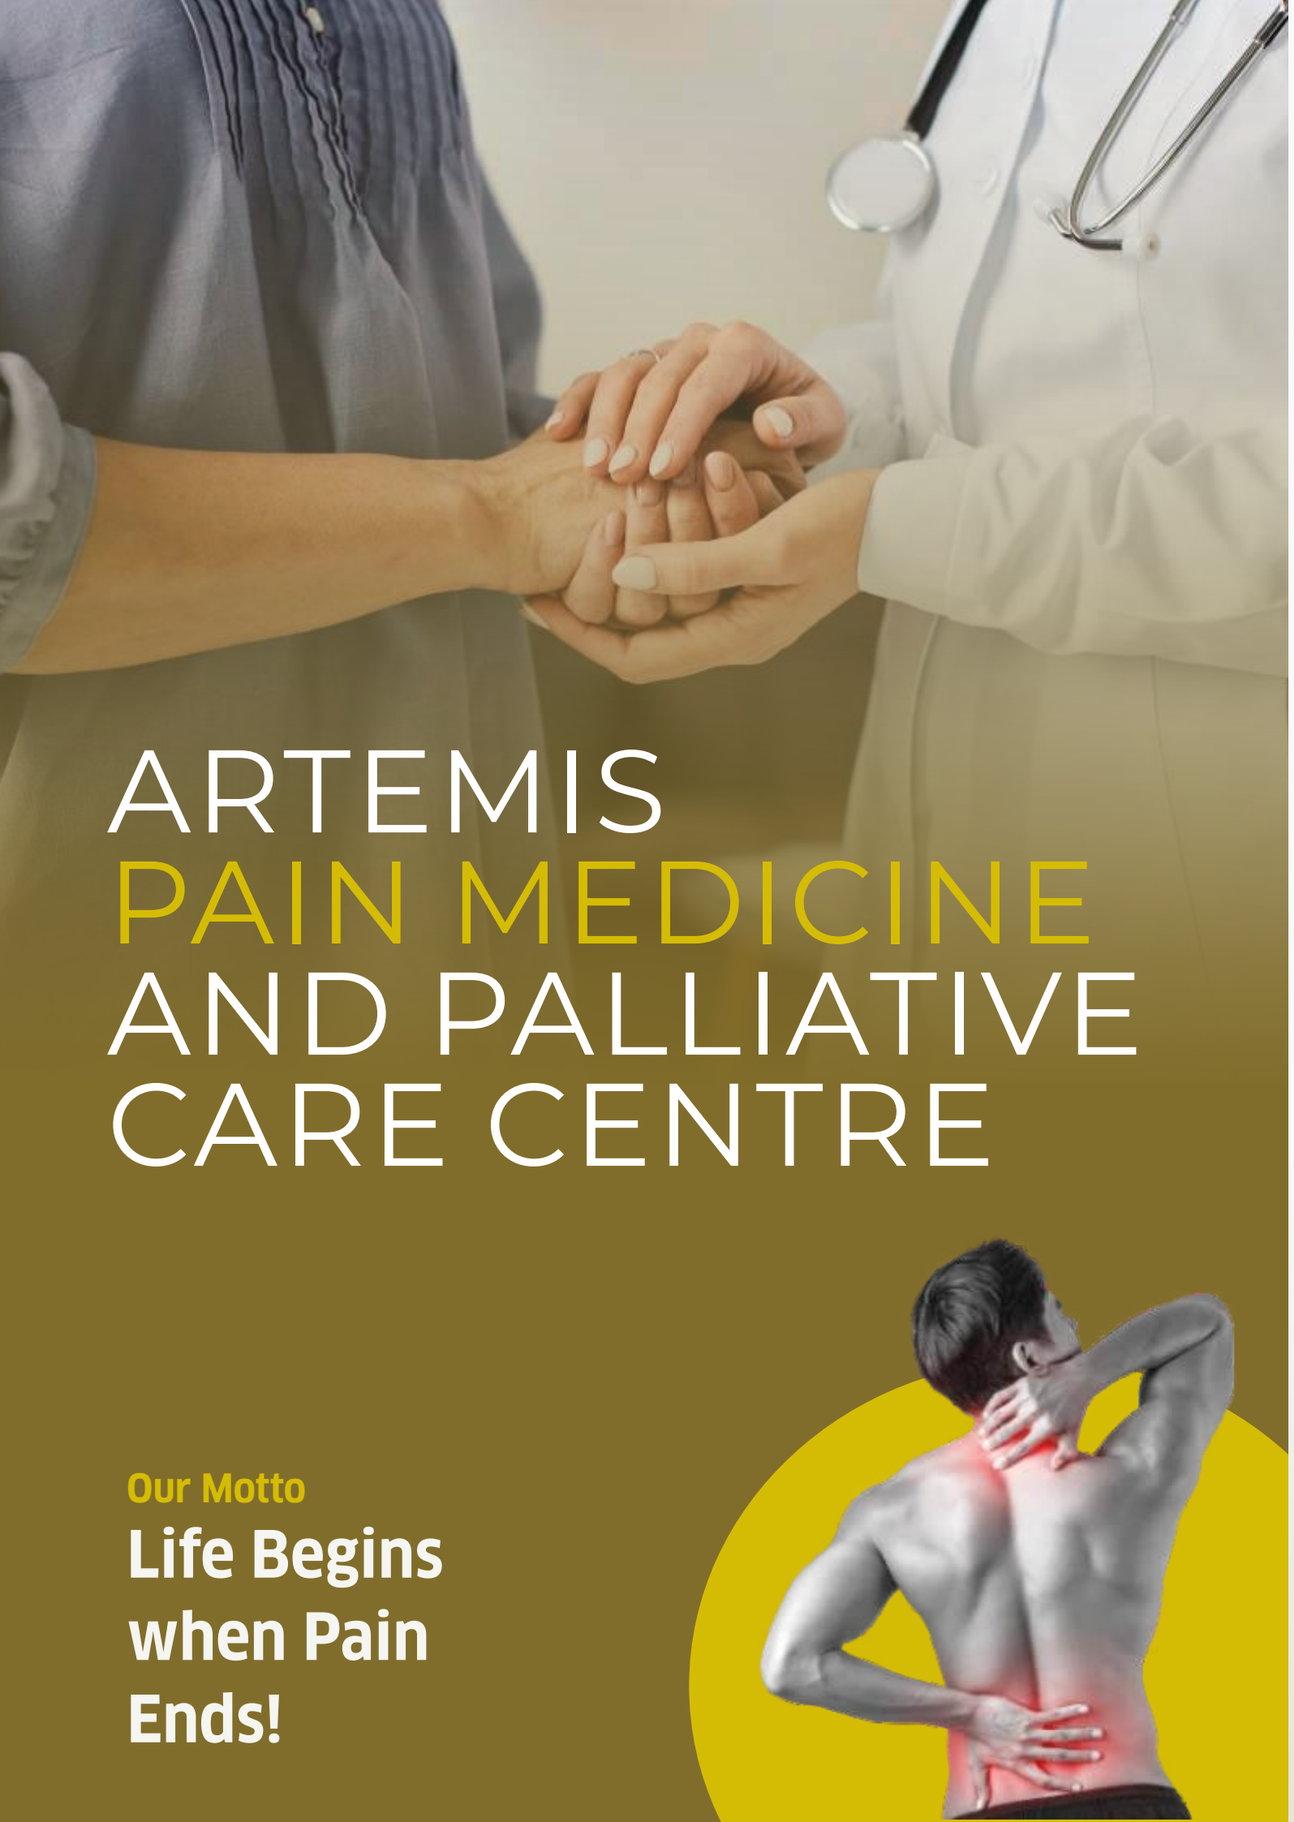

- Face Rejuvenation
- Face Lift
- Neck Lift
- Rhinoplasty
- Lip Augmentation
- Lip Reduction
- Chin Augmentation
- Chin Reduction
- Cheek, Jaw And Chin Implants
- Otoplasty or Ear Reshaping

- Breast/Chest
- Breast Augmentation
- Breast Reduction Surgery
- Breast Lift (Mastopexy)
- Male Breast Reduction (Gynaecomastia)

- Body Contouring
- Liposuction
- Abdominoplasty (tummy tuck)
- Brachioplasty (arm lif)
- Medial Thigh Plasty
- Lateral Thigh Lift & Buttock Lift

- Other Procedures
- Fat Transfer
- Ear Lobe Repair
- Xanthelassma
- Dimple Creation Surgery
- Mole Removal
- Hymenoplasty
- Vaginal Tightening
- Hair Transplant

- Reconstructive Surgery
- Cleft Lip & Palate
- Ear Reconstruction
- Breast Reconstruction

ARTEMIS PAIN MEDICINE AND PALLIATIVE CARE CENTRE

Our Motto

Life Begins when Pain Ends!

Pain Medicine (Algology) is the speciality that deals with all types of Chronic Painful conditions. Pain is designated as the fifth vital sign. Chronic and Cancer pain management, Palliative Care and End of Life care constitutes a priority for our department, which is first of its kind in any Corporate Hospital across Delhi/NCR.

Defeat Chronic Pain Now with Non Surgical Interventions!

We expertise in treating following conditions

- Back Pain
- Slip Disc Pain
- Neck Pain
- Shoulder Pain
- Knee Pain
- Heel Pain
- Facial Pain (Trigeminal Neuralgia)
- Cancer Pain
- Ischemic Pain
- Phantom Limb Pain
- Neuropathic Pain

Completed

5000+

Most Advanced Interventions for Chronic & Cancer Pain

Also recognised as a Centre for Advanced Fellowship Programme in Pain Medicine by Indian Academy of Pain Medicine (IAPM), Indian Society for Study of Pain (ISSP).

- Platelet Rich Plasma (PRP)
- Stem Cells Therapy

Cancer Pain
Management &
Palliative Care

We also specialize in Care of Terminally ill Patients & Home Care Services

Department of RHEUMATOLOGY AND CLINICAL IMMUNOLOGY

Adult & Paediatrics Rheumatology

Only a well-trained specialist can put these together into perspective and design appropriate therapy for managing patients with autoimmune diseases.

Unlike previously thought, autoimmune diseases are fairly common. It is just that they are under diagnosed because of low awareness resulting in substantial delay in treatment.

Rheumatology and Clinical Immunology is a super-speciality which deals with diseases arising out of disturbances in the immune system of the body. Our immune system is meant to protect us. However when the immune system goes wrong, rather than protecting, it starts damaging the cells and tissues of the body and result in diseases which are broadly known as autoimmune diseases.

Autoimmune diseases can range from mild to severe and sometimes fatal diseases. Most of the times it affects multiple systems of the body and therefore to diagnose and treat them properly, a wholesome approach is required. For example, an autoimmune disease can simultaneously affect our skin, joints (causing arthritis), muscles (causing weakness), lung and kidney.

Following features increase the likelihood of having Autoimmune Diseases!

- Arthritis
- Rash
- Oral ulcers
- Unexplained prolonged fever
- Unexplained weight loss
- Fatigue
- Excessive sensitivity to sunlight (photosensitivity)
- Breathlessness / cough (especially if you have been diagnosed with ILD)
- Unexplained blackness / gangrene of fingers or toes
- Color change in the fingers on exposure to cold (fingers becoming pale)
- Chronic low backache with stiffness
- Unexplained redness in the eyes (especially if recurrent)
- Unexplained ulcers over leg
- Painful nodules, especially if they are red
- Lack of pulses in hands / feet / neck
- Unexplained low hemoglobin / platelet / WBC

Treatments Available for Following Conditions

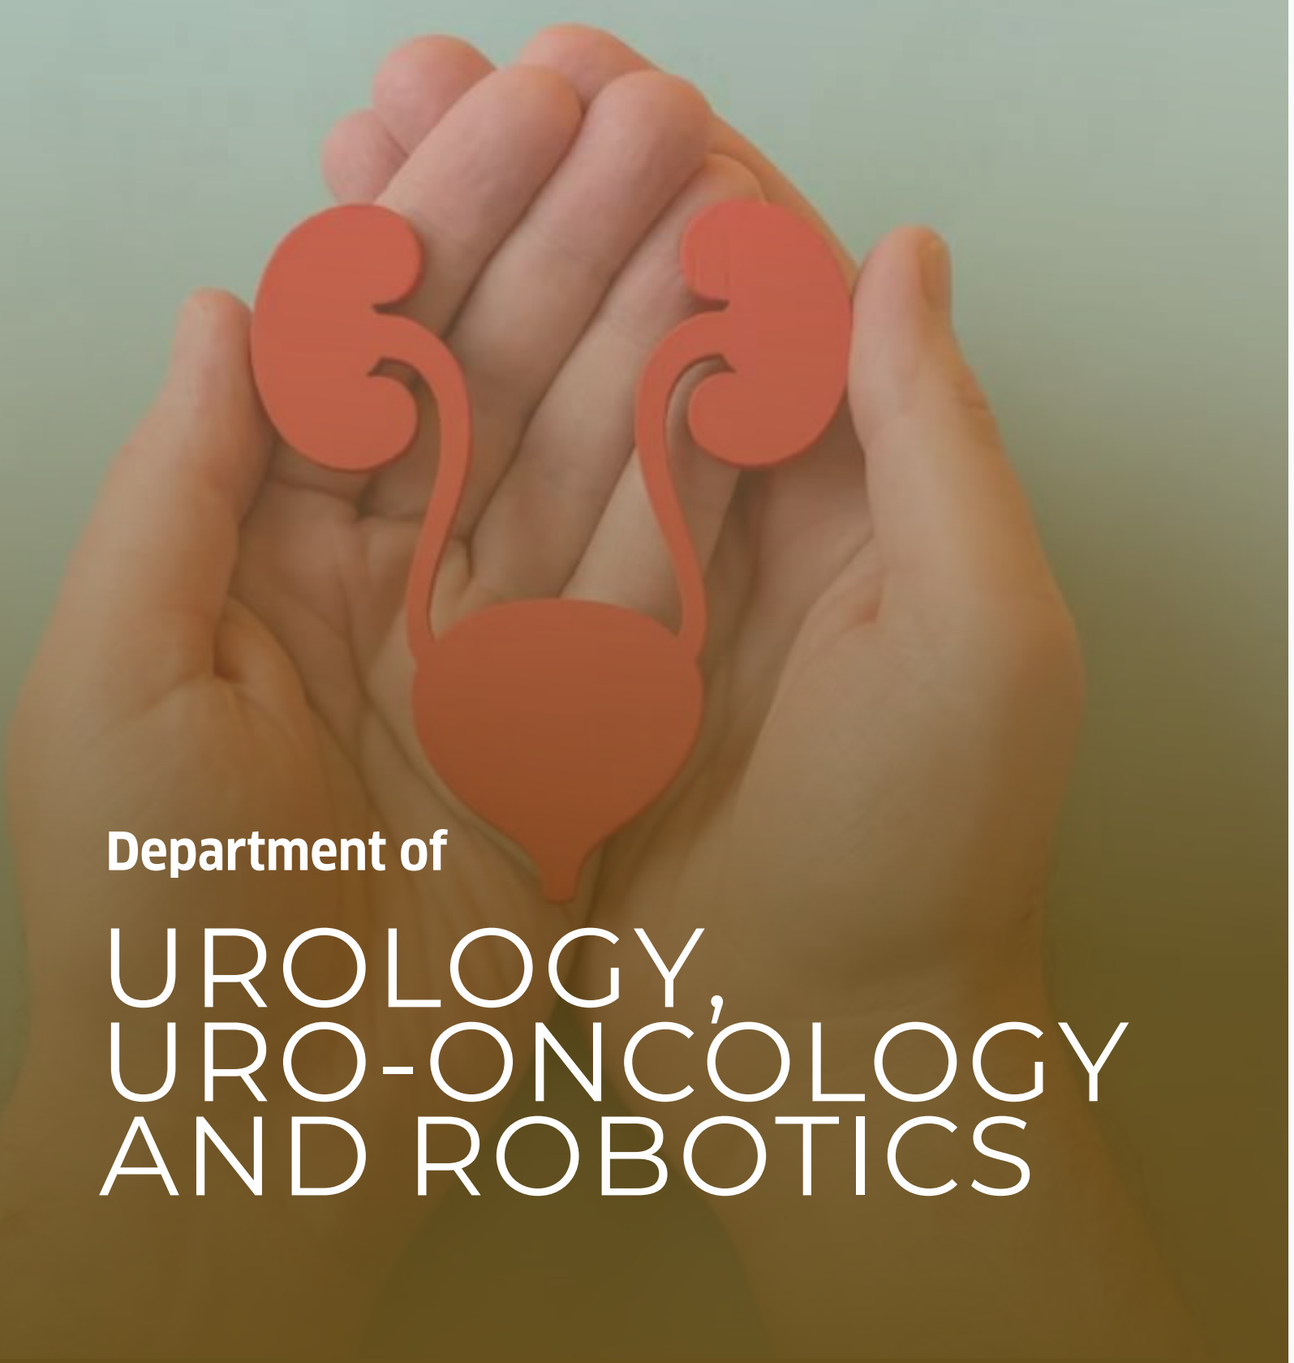

- Rheumatoid Arthritis
- Spondyloarthropathy / Ankylosing spondylitis (SpA or SSA)
- Reactive arthritis
- Psoriatic arthritis
- Gout
- SLE / Lupus
- Myositis / dermatomyositis / polymyositis
- Scleroderma / Systemic sclerosis
- Sjogren's syndrome
- Behcet's disease
- Sarcoidosis
- Vasculitis
- Panniculitis / erythema nodosum
- Osteoporosis
- Anti-phospholipid syndrome
- MCTD / UCTD
- Fibromyalgia

Paediatric Rheumatology

The study of rheumatic disorders in children and adolescents is the focus of Pediatric Rheumatology, a sub-specialty of Pediatrics. Rheumatological diseases in children are caused by immune system dysregulation, which results in an exaggerated immune response and hyperinflammation that attack the child's own cells and organs, including the joints, eyes, skin, lungs, heart, gut, and brain.

Treatments Avaialable for

- Juvenile Idiopathic Arthritis
- Systemic Juvenile Idiopathic Arthritis
- Juvenile Systemic Lupus Erythematosus
- Autoinflammatory Syndromes
- Juvenile Dermatomyositis
- Scleroderma
- Autoimmune Uveitis
- Raynaud's phenomenon

Department of UROLOGY, URO-ONCOLOGY AND ROBOTICS

Adult & Paediatrics Urology

Internationally Acclaimed Experts delivering Excellent Patient Outcomes

The Department of Urology is staffed by professionals adept at the diagnosis and management of the entire spectrum of urologic diseases!

Urologic diseases or conditions include urinary tract infections, kidney stones, bladder control problems, and prostate problems, among others. Department of Urology diagnose and treat problems involving the male and female urinary tract and the male reproductive organs. The department strives to cure surgically conditions like kidney stones, kidney failures, prostate and cancer of the prostate and sexual dysfunction.

The various kinds of operative procedures used for treating these diseases are supported by the latest available technology. The department offers most current, up-to-date and streamlined treatment for all the urological diseases.

Our Services

Advanced Urology Services

- Robotic Surgery for Cancers of Prostate, Kidney and Bladder Cancers
- Robotic Reconstructive surgery (Pyeloplasty/ Ureteric Reimplant)
- MRI Guided Prostate Biopsy
- ABO Incompatible Kidney Transplant
- Laparoscopic Donor Nephrectomy
- Dialysis Access surgeries (AV Fistula/ CAPD)
- Flexible Ureteroscopy/ Miniperc for Kidney Stones
- Female Urology & Paediatric Urology
- Andrology and Male Sexual Health

Management of Urological Cancers

- Robotic surgery for Urologic Cancers (Prostate/Kidney/ Bladder Cancers)
- Robotic Partial Nephrectomy/ Robotic Neobladder
- Robotic Reconstructive Surgery (Pyeloplasty/ Ureteric Reimplant)
- Intraoperative Ultrasound for Tumor Demarcation
- MRI Guided Prostate Biopsy
- Multidisciplinary Tumor Board Decisions
- Advanced diagnostics with 3 tesla MRI/ PSMA PET CT

We are equipped with State-of-the-Art Robotic Surgery for Urological Cancers & Kidney Transplant Treatments!

da Vinci® Robotic Surgical System

Department of

EAR, NOSE AND THROAT

Adult & Paediatrics ENT

We are nationally and internationally known for providing good, affordable and reliable treatment for Entire spectrum of ENT diseases and disorders. Our team of ENT doctors are adept at performing all routine as well as complicated procedures pertaining to ear, nose and throat.

The department of ENT at Artemis is an all-inclusive, comprehensive unit with a list of diagnostic and therapeutic options under the same roof. A set of detailed tests and evaluations undertaken by a team of proficient ENT Surgeons and Audiologists determine the further course of action.

Our Goals

- Provide excellent state-of-the-art patient care in a supportive environment
- Conduct educational programs that provide excellent training in research and clinical care
- Enhance knowledge through relevant research of the highest quality and translate it rapidly into bedside care

Our Services

- **Paediatric Otolaryngology** : Children with tonsils, adenoids ear diseases, allergy and sinus diseases, airway problems, cleft lip and palate, voice and swallowing disorders, and acquired and congenital head and neck masses
- **Rhinology** : Specialize in nose and sinus problems such as deviated nasal septum, treat people with nasal polyps, chronic sinusitis, csf leak skull base tumors and many other conditions
- **Otology** : It includes treatment of perforation of ear drum, hearing loss, cholesteatoma, tinnitus, dizziness, infectious and inflammatory diseases of the ear, csom, facial nerve disorders, congenital malformations of the ear, and tumors of the ear, otosclerosis, and skull base. We have recently introduced endoscopic ear surgery and tuboplasty for eustachian tube disorders
- **Laryngology & Voice Clinic** : Benign (non-cancerous) vocal cord lesions. Cancerous or precancerous lesions, Infectious or inflammatory conditions, Autoimmune conditions, Neurologic conditions, Airway conditions, Vocal cord motion abnormalities. Our forte is airway reconstruction surgery for which we get referrals across the country for airway reconstruction surgery (both endoscopic and open)
- **Cochlear Implant :** An electronic device that improves hearing. It can be an option for people who have severe hearing loss and are not able to hear well with hearing aids.
- **Audiology and Speech Therapy**
- **Allergy Clinic and Immunotherapy**
- **Swallowing Clinic** : Patients with swallowing problems from various issues like neurological stroke, parkinsonism, neuro degenerative conditions, post cancer rehabilitation, post radiation and children with syndromic problems.
- **Vertigo Clinic** : Common problems like bppv and labyrinthitis, menieres disease etc are diagnosed and treated.

Our State-of-the Art

- COBLATION®radiofrequency Cutring Device
- Zeiss micro scope
- Medtronic M5 drill and micro debrider system
- Medtronic navigational system for skull base surgery
- Storz HD speis system
- Holmium laser
- ECMO
- Narrow band imaging
- Ultra flexible scope 1.9 mm for Fees , swallowing and videolaryngoscopy
- Trans nasal esophagoscopyand flexible bronchoscopy for biopsy
- Rigid bronchoscopy & esophagoscopy
- Balloons for sinoplasty, eustachian tube plasty & laryngotrachoppasty
- Video laryngscopes
- Endoscopic ear scopes and instruments
- Voice analysis software and video highland definition laryngoscopy

Department of

MENTAL HEALTH AND BEHAVIORAL SCIENCES

Adult & Paediatrics Mental Health

Whether it is a clinical condition such as Depression, Anxiety Disorder, Schizophrenia or Substance use disorder or psychological issues such as relationship problems, marital problems or workplace stress, we offer an umbrella of treatments covering individual needs and requirements.

At Artemis, we believe in holistic healthcare delivery, which is not only restricted to physical health, but also includes mental health. The Psychology Department offers a full continuum of Behavioral Health Services for emotional, behavioral and developmental disorders.

We provides a wide range of Psychological Assessments and Treatment options for adults, as well as children and adolescents. With a state of art mental health department, we have a team of reputed and thorough psychiatrists backed by an equally efficient and professional team of psychologists.

Whereas psychiatrists diagnose and treat mental disorders with medication, psychologists build on the treatment with psychological testing, therapy and counselling.

Services / Treatments Offered

- Developmental, Behaviour, and Psychosocial assessment; to provide an understanding of the presenting problems and their origins.
- Assessment of Developmental or Learning Disorders in children
- Depression and Anxiety disorders
- Adjustment disorders related to Acute and Chronic stress
- Obsessive compulsive disorder
- Emotional/Behavioral problems related to chronic neurological or medical illness
- Standardised, comprehensive Psychological and educational achievement tests which evaluate intellectual and learning ability
- Diagnostic assessment involving structured interviews and/or rating scales, and/or projective tests in cases where this is relevant to the patient's presentation
- Short term interventions based on a range of treatment models and techniques including cognitive behaviour therapy, individual psychotherapy, family therapy, pain management, parenting skills, group therapy, Marital counseling, Relaxation techniques.

Watch out for Signs of Stress Overload

- Hypertension
- Diabetes
- Heart disease
- Skin problems
- Depression
- Cosmetic complaints- Premature baldness, hairfall, acne etc
- Hormonal problems- Early puberty/menopause
- Weight gain or loss
- Eating disorders
- Respiratory complaints

At Artemis Hospitals, a team of professionals are there to help you cope with your mental health.

Department Of
INTERNAL MEDICINE

This branch of medical specialty is committed and directed towards the diagnosis and medical treatment of adults. The word 'Internal medicine' came from a German term “Innere Medizin" which means combining the Science of lab with care of patient.

Physicians take the entire case of the patient rather than one particular organ system hence his/her approach is more broad and holistic. An Internist liaises between a super specialist and the patient. While on one hand the super specialist depends upon the Internist for initial diagnosis & post-therapeutic day-to-day care of patients, the patients require Internist for their continuous management.

Services / Treatments Offered

- Artemis Preventive Health-Check
- Lifestyle Disorders
- Multi Organ Disorders
- Infectious Diseases
- Genetic Medicine

Department Of
ENDOCRINOLOGY

The Endocrinology & Diabetology speciality offers care for various metabolic, pituitary, thyroid and diabetes-related conditions. At Artemis we have a multi-disciplinary team including endocrinologists, diabetic educators, dietitians and nurses.

The treatment of disorders such as diabetes, obesity, thyroid, PCOS, osteoporosis, as well as less common, and complex hormonal disorders is given in concurrence with specialists who are also involved in diabetes care, such as cardiologists, ophthalmologists, nephrologists, and dermatologists as well as primary care physicians.

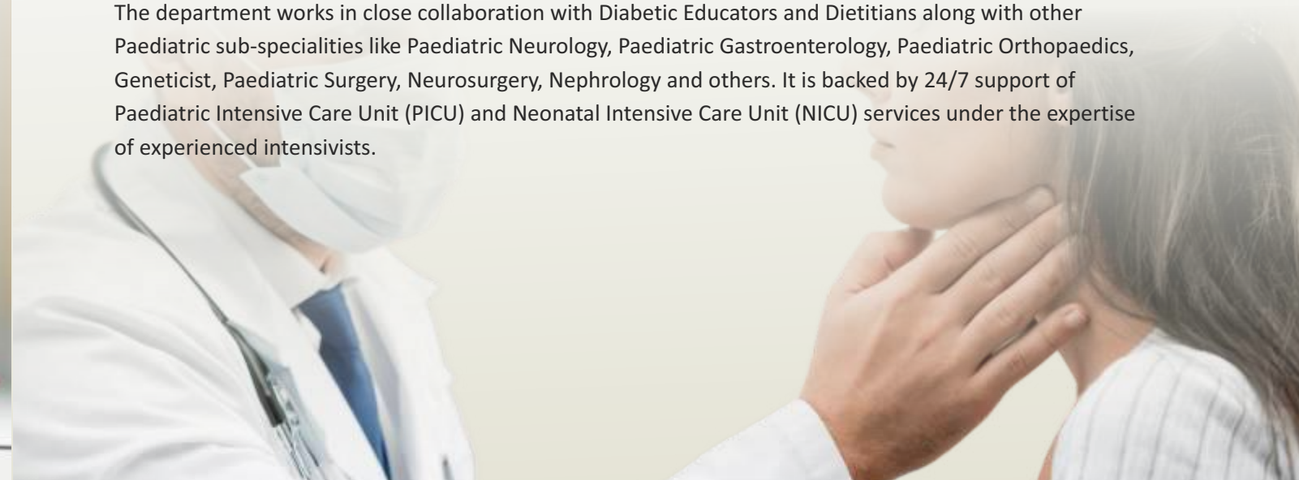

Services / Treatments Offered

- Diabetes and Hypoglycemia
- Adrenal Disorders
- Thyroid Disorders
- Pituitary Disorders
- Metabolic Bone, Calcium and Parathyroid Disorders
- Lipid Disorders
- Gonadal and Menstrual Disorders

Paediatric and Adolescent Endocrinology

Artemis is proud to be among the few specialized departments all around Delhi NCR meant specifically for catering to the Endocrinological needs of children, teenagers and young adults. The Department brings excellence in the care of children, teenagers and youth with hormonal disorders. We provide cutting -edge technology and advancements in hormonal disorders and deliver our services with utmost compassion because we understand having a chronic disease takes its toll on children as well as their parents.

The department works in close collaboration with Diabetic Educators and Dietitians along with other Paediatric sub-specialities like Paediatric Neurology, Paediatric Gastroenterology, Paediatric Orthopaedics, Geneticist, Paediatric Surgery, Neurosurgery, Nephrology and others. It is backed by 24/7 support of Paediatric Intensive Care Unit (PICU) and Neonatal Intensive Care Unit (NICU) services under the expertise of experienced intensivists.

Department Of
OPHTHALMOLOGY

Eyes are the mirror of the soul and a window to the body. There are many conditions that can affect our vision such as Cataract, Glaucoma, Diabetic retinopathy and Age-related macular degeneration. Some of these diseases are preventable, others treatable.Thus care of the eyes is important at all ages, at all times. We deliver an all-inclusive eye care treatment at Artemis.

Our cutting edge facilities include both diagnostic and therapeutic modalities.
The centre has installed the very progressive VISX system of Excimer Laser for LASIK surgery, technology in our Phacoemulsification machine and the Intra-ocular lenses (mono-focal, Multi-focal, Toric etc) which ensures a world-class treatment for cataract and most of the other ophthalmic diseases.

  - Bridges
  - Implants
  - Dentures
  - Full mouth rehabilitation
  - Partial dentures-acrylic and cast partial
  - Implant supported

- **Cosmetic Dentistry**
  - Veneers
  - Composite
  - Porcelain

- **Tooth Whitening**
  - Tooth alignment with braces
  - Metal
  - Tooth coloured
  - Lingual
  - Invisalign
  - Smile makeovers

- **Surgical Procedures**
  - All types of tooth removal
  - Corrective surgeries for jaws
  - Fracture correction
  - Surgical removal of growths, cysts or tumours
  - Apicoectomy

- **What's New?**
  - Lasers in dentistry
  - Gummy smile correction
  - Whitening
  - Invisalign for teeth alignment
  - Metal free crowns
  - Implants
  - Tooth jewellery
  - Veneers and laminates

DIAGNOSTICS & LABORATORY SERVICES

A sound diagnostic facility forms the backbone of the efficient practice of modern medicine. The Artemis Hospital Laboratory is a one stop testing facility for all basic and sophisticated high-end investigations. It displays commitment to provide quality, accurate and timely laboratory services round the clock (24x7) to assist in targeted patient care.

Since inception, the lab has received accreditations **NABH (2009), NABL (2012), JCI (2013), Green OT (2015)** and is continuously commensurating with the defined quality standards.

We are equipped to perform testing for

- ✓ **Biochemistry**
- ✓ **Clinical Pathology**
- ✓ **Hematology**
- ✓ **Microbiology**
- ✓ **Serology**
- ✓ **Histopathology**
- ✓ **Cytopathology**
- ✓ **Molecular Testing Divisions**

We have included **240 tests** in NABL scope.

It also caters to the specialized testing for **Molecular Oncology (Cancers), Molecular Infectious, Focused Hemato Pathology & Genetic disorders.**

Constant up-gradation and introduction of new tests and methods to meet the demands of the clinicians has been one of our major aims.

Our Major Quality Indicators :
Error Reporting/ 1000 Investigations | Percentage of Reports not Correlating with Clinical Diagnosis | Adherence to Safety Precautions by Lab Staff | Monitoring TAT

- **The Pathology Lab is supported by high-end DSIR certified Research Lab** to explore deeper insights into the physiological and molecular pathways.
- **Our home collection facility is a value added feature.** This includes pre-sampling instructions, after sampling consultation with lab medicine experts and trend analysis.
- **Laboratory is held together Laboratory Information System or LIS.** The LIS is interfaced with the Hospital Information System (HIS). All patient results are verified by qualified doctors. Reports are available online on patient portal in the shortest possible time.

RADIOLOGY & IMAGING SERVICES

The Department of Radiology is at a crest in terms of high quality medical imaging and sub specialised interpretation of those images. The unit provides imaging and interpretation services to all In- Patient and Out-Patient facilities.

All forms of diagnostic and interventional radiological procedures including sophisticated vascular and neuro-interventional procedures are performed. The department provides a full support of tertiary care radiologic services, including Neuro-radiology and Interventional- Neuro-radiology, Cardiovascular Interventional Radiology, specialised Musculoskeletal, Chest and Abdomen Radiology, Women's Imaging and Nuclear Medicine.

We have a fully loaded Radiology Department which is backed by Radiology Information system (RIS) - a repository of patient data and reports which contribute to the electronic medical records RIS, which is a computerised database used by radiology departments to store, control and distribute patient radiological data and imagery. Our RIS assists in patient tracking & scheduling, result reporting and image tracking. RIS complements our HIS (Hospital Information Systems).

Embracing The Future of Imaging, Scientific Minds & State of the Art Technology

Our Services

- Biomatrix MRI- 3 and 1.5 T
- Multislice CT Scan
- 3D/ 4D USG and Color Doppler with Fusion
- Digital Radiography
- Mammography
- Interventional Radiology
- Vacuum Assisted Breast Biopsy (VABB)
- Bone Densitometry
- Fetal Medicine

1.5 T Scanner
For Imaging Excellence

VABB
Breast Biopsy System

THE PATRON

Dr. Devlina Chakravarty

MD, DNB, DMRD, Radiology
Managing Director
Artemis Hospitals

Dr. Devlina Chakravarty is a medical graduate from New Delhi's esteemed Lady Hardinge Medical College. She did her MD Radiology from Mumbai University followed by fellowships/perceptorship programmes from University of Berlin (Germany), UCLA (Los Angeles) and Brigham & Women (Bostan) in Head and Neck & Body Imaging.

- She worked as senior faculty and Programme Director in Radiology in different reputed hospitals in Delhi before joining Artemis in 2007.
- She has been an enabler in the transformation journey of Artemis Hospitals by compassionately using her experience that she has amassed over the years.
- She strongly believes in ethical practices, transparency in healthcare and quality of service. She believes private hospitals can make "profits" without "profiteering".
- Ethical priority remains paramount. She advocates that values, duties and commitments towards the profession transcends everything else.
- She is a proponent of a trustworthy and transparent healthcare system, well aware that building, restoring and maintaining trust in the health system is a key to its future.
- She is a process and system driven person and believes strongly in "quality" and "efficiency" in healthcare.
- Good medical outcomes, patient safety, infection control, service excellence are something very close to her heart over and above creating great working environments for doctors and all other staff, through a transparent system of management.
- She has been a promoter of standards like affordability, accessibility and integrity in delivering medical care which are fundamental to the success of a sound healthcare delivery system.
- "Personalised tertiary care" with "service excellence" is her motto.

The landscape of the healthcare industry has undergone quantum shift and Artemis Hospitals has excelled under her aegisin the healthcare delivery space. The growth trajectory of Artemis leans on her scrupulous involvement in crucial hospital projects, empowering breakthrough processes, initiating a robust culture of clinical excellence as well as undivided patient focus. She has been instrumental in steering the hospital to new heights thereby shaping it into an emerging healthcare destination for both national and international patients.

Accolades & Memberships

- Dr. Devlina Chakravarty is Former Co-chair, FICCI MVT Committee (The Federation of Indian Chambers of Commerce & Industry) (Medical Value Travel).
- She is an impetus and inspiration as a speaker/leader at various National and International expositions pertaining toIndian Healthcare at various fora like CII (Confederation of Indian Industry), ASSOCHAM (The Associated Chambers of Commerce and Industry of India.
- She has been a proactive and enthused member in the steering Committee in guiding the policy advocacy for Indian healthcare.
- She has facilitated mergence of modern medicine and traditional systems like AYUSH (Ayurveda, Yoga, Naturopathy, Unani, Siddha, Sowa-Rigpa and Homoeopathy).
- She is associated with BRICS (WBA, Women's Business Alliance, Member), Indian Radiological Association (Lifetime Member), Neurological Society of India (Member) and Indian Menopause Society (Member).

Tirelessly working through the pandemic, she worked synchronously and in tandem with the head of other hospitals in augmenting the medical infrastructure as well as the talent. She has been a trailblazer in showing the way to the general public through national and social media. Her clout and leadership traits have empowered the Indian healthcare industry which in turn has enabled a spot for itself globally.
